

All Maryville Unites in Extending a Cordial Invitation to You All to Come to Her Fall Festival This Week

TIME TO GATHER IT

PICK OUT YOUR SEED EARS OF CORN WHILE IN FIELD.

BEFORE CORN IS INJURED

Then Hang It Up to Dry Out, Says S. M. Jordan, and You Will Raise More on Every Acre.

Right now is the time in most fields for gathering next season's seed corn, says S. M. Jordan, manager of the Pettis county bureau of agriculture.

It has been rarely seen that corn has ripened up in such fine condition, and since there has been nothing to possibly injure the seed quality, this seed should be gathered now, and if hung up and well dried out before cold weather the best of results should follow. It is very certain that finer seed quality was never known in Pettis county, nor in any other county, than we have this year, and all possible care should be given it.

Weak seed may grow but strong seed will grow better, and the quality of the seed can be assured for next spring, and if any farmer plants poor seed next spring it will be entirely due to his own neglect.

Seed should be gathered as soon as the first ears ripen, and these first ripening ears should be the only ones saved for seed. It will be found that such ears as ripen first are nearly always good ears, commonly found low on good stalks, and the rule should be: Select the earliest ripening ears that have good size and that grow on short jointed stalks, that have good brace roots, and the ear, when fully ripe, should hang with point somewhat downward.

More can be learned about the producing value of a seed ear by the stalk than can be learned from the ear. A short jointed stalk means an extensive blade system, and the brace roots tell much of the extent of the root system. Keep this in mind and the reasons will be easy.

The leaf and the root system of plants correspond exactly to the lungs and digestive organs of animals, and no animal can be a good one if it has poor lungs or poor organs of digestion, and it is just as reasonable that a plant cannot grow a good producing ear if it has a small leaf system or a small root system.

When this seed is gathered and carried in from the fields it should at once be hung in a dry, well ventilated place, not over stock, as the breath of stock in winter will damage the seed. It should be kept unshelled until near the time to plant.

In many corn fields over the state one man can secure in one day 1,000 such ears, and these should plant nearly 100 acres. Corn selected in the above manner and rightly stored will make from one to five bushels more per acre at least than the crib-seed that so many plant. If it makes but one more bushel per acre on the 1,000 ears that can be secured in one day it will mean from \$50 to \$250 for the day's work. If all farmers would save seed in this manner and would get five bushels more per acre in Nodaway county, at 60c a bushel it would bring about \$300,000 more money—enough to build about 100 miles of rock roads.

This is not intended to convey some information that a farmer does not have, but simply as a reminder to do what we all know is the right thing to do.

Has Some Fine Corn.

S. S. Webb of Burlington Junction was in Maryville Monday with ten ears of fine Yellow Dent corn that he raised this year. He will have it on exhibition at the fair.

Henry Westfall returned Saturday night from a three weeks' western trip to Wyoming and Montana.

DO YOU NEED GLASSES?

Eyes Tested Free

Glasses Accurately Fitted by expert Optician. Repairs Promptly Executed at CRANE'S.

ON THIS DAY 31 YEARS AGO.

Snow fell in Maryville, according to James Fraser, an Old Settler. James Fraser of this city said Monday that thirty-one years ago today, or September 16, 1881, snow fell in this community, and would have made six inches of snow if it hadn't been for the warm ground. The weather was very chilly and cool, and Mr. Fraser says he remembers that he was buying stock near Clyde on that day. He had on only a linen coat and when the snow and cold wave came he purchased an overcoat at Clyde to keep him.

A Son at Butler Home.

Mr. and Mrs. Leo Butler of this city announce the birth of a son on Sunday.

F. M. PETTY IS DEAD

PROMINENT MERCHANT PASSED AWAY EARLY MONDAY.

HE HAD CANCER OF LIVER

Funeral Services Will Be Held at the Presbyterian Church Wednesday at 3 o'clock.

Mr. F. M. Petty, for twenty-eight years a Maryville merchant, passed away at his home Monday morning at 4 o'clock. Although it was generally known that Mr. Petty could not survive many days, his death at this time was a surprise even to his physicians.

Mr. Petty's affliction was cancer of the liver. He had never known a day's sickness in his life, excepting a light attack of grip a number of years ago from which he fully recovered, until two years ago, when his health began to fail. He did not suffer from his illness, and only regarded it a weakness that he would surely be able to overcome. But his weakness was due to troubling over the continued failing condition of business matters, over which he had no control, and he finally gave up the fight three weeks ago and went to a physician to see what was the matter that he could not gain strength. Four physicians pronounced his condition beyond remedy, and it was the first that he or any member of his family knew that he was seriously ill.

Mr. Petty set to work at once to clear up his business matters the best he could, and ordered a foreclosure. He did not complain, but proceeded in his usual manly way to leave everything in the best shape possible for his creditors.

An unusually sad thing about Mr. Petty's death is that his daughter Hazel, who was married the 15th of June last to Rev. Joel Babcock Hayden, and are now in Europe on their honeymoon does not yet know of her father's sickness and death, and it is not now known where they are. It is believed that a letter will be received from her this week, as a postcard came from Algiers a few days since to Mrs. Hayden's little niece, Virginia Curfman.

Letters three weeks ago and a cablegram several days ago were sent to her, but no word has come from them, so it is thought they have been far inland. Their honeymoon trip was to continue until the first of January, when they would settle in Poland for a two years' study of sociological conditions.

Mrs. Petty will not send a cablegram to her daughter announcing the father's death, as she thinks the shock would prove too much for her but with the messages already gone and the letters that will follow the news of his death will not come so severe. It will indeed be hard news to hear—the first since she left home. But what a memory will be hers! His Christian life and parting words with her in a prayer to God for her safe keeping and future usefulness as the wife of a minister. Better such a memory as that than a legacy of millions without it.

Frederick McHendrey Petty was born in Sheboygan, Wis., on the 4th day of June, 1851. When he was a small child his parents moved to Rut-

EVENTS OF MARYVILLE'S BIG WEEK

DAILY AND NIGHTLY FEATURES

Free attractions every hour during the afternoon and evening by the Roman Classical Posing People, the Quintet Bicycle People, the Four Air Flying DeAllens, and the Cornall's Famous American Acrobats. Music by the Maryville Concert Band of twenty-five pieces and Miss Alma Nash's Ladies' Military Band of thirty-five pieces.

Some of the pay attractions are as follows: Frontier Show, Plantation Show of twelve colored people, All-Star Vaudeville and Comedy Show, in which Captain Woolridge, the world's greatest detective and lecturer, will appear; Prof. James' All-Star Stadium Show, Grace Russell Ladies' Minstrels, Charles McDonald's den of reptiles and the largest man living, Nine's "Three-in-One," featuring the largest boy in the world and snakes from all nations; Bas-kins, presenting the original Royal Ruby, America's foremost art model, supported by a troupe of Persian musicians; Thomas' big Electric Carry-Us-All and a Merry-Go-Round.

SPECIAL FEATURES.

Fruit and vegetable exhibition, a display of farm and home machinery and implements, and the poultry show and exhibition.

WEEK'S FEATURES.

TUESDAY—Old Settlers' and Old Soldiers' Day. Automobile parade at 1:30 o'clock in the afternoon.

WEDNESDAY—Horse and Mule Show in the morning only.

THURSDAY—Horse and Mule Show in the morning; public wedding on the new band stand in the court house yard at 2:30 in the afternoon.

FRIDAY—Fraternal parade in the evening.

SATURDAY—Shetland Pony Show in the morning; Children's Carnival Parade at 2:30 o'clock in the afternoon, with Sylvia Fra-zee as Queen, heading the parade.

GENERAL INFORMATION.

An information bureau will be located in a booth in front of the court house yard on the west side, where all questions that can will be answered.

land, Vt., and a few years later to Freemont, O. When Mr. Petty was 14 years old his mother died and the family moved to Geneseo, Ill., where he grew to young manhood, receiving most of his education at the college at Henry, Ill. The family then moved to Eldora, Ia., where Mr. Petty went into the dry goods business, and was successful.

On March 2, 1876, he married Miss Lizzie Smith of Eldora, who survives him with two daughters, Nellie, the wife of Roy Curfman of the Curfman Brothers Lumber company of this city, and Hazel, wife of Rev. Joel Babcock Hayden, recently of Reading, Pa. Mr. and Mrs. Petty were bereaved of their eldest child.

In 1884 Mr. and Mrs. Petty moved to Maryville. Mr. Petty purchased the dry goods business of John Lieber, who at that time was regarded as Maryville's most successful merchant. He wished to retire after long years in that business, and waited until he found a capable young man whom he thought would continue the business and be a worthy successor. He made no mistake in his choice, for the gentlemanly, quiet, yet vigorous young man proved every minute of the twenty-eight years that followed an uprightness in business and social qualities that could not be excellent anywhere.

Mr. Petty was converted and united with the First Presbyterian church of this city in 1887. He was made an elder in the church the same year and held that office until his death. He was superintendent of the Sunday school for many years until a few months ago, when he gave it up on account of physical weakness, and also taught in the Sunday school. He was a great lover of music, a fine singer, and had been a member of the choir since he came to Maryville. He started the young people's movement in the church before the Christian Endeavor was organized, and had worked for many years toward the establishment of a Y. M. C. A. in Maryville. It is safe to say that Mr. Petty has had a hand in everything that was intended to Christianize the sentiment of our city. He was indeed a good man and all our people mourn his death.

He leaves three brothers and one sister. They are Edwin J. Petty of Curtis, Neb.; C. E. Petty of Eldorado, Ia.; H. G. Petty of Ft. Collins, Col., and Don C. Petty in California, and Mrs. William Junkin of Charlton, Ia.

ONLY HAD 417 AT SUNDAY SCHOOL

Sunday Was Rally Day for the Sunday School of the First M. E. Church.

An attendance of 417 was present at the rally day of the First M. E. church Sunday school Sunday morning. This is the largest attendance ever present at the Sunday school in this church, according to W. F. Smith, who is superintendent of the Sunday school. The average attendance for this Sunday school during the last quarter was 277.

At this church Sunday morning there were also eight automobiles along the church sidewalk. The church is urging the members that have cars to join the Methodist Episcopal Auto club and to see how many cars they can line up in front of the church.

ROBBED OF HIS ROLL

WILLIAM ELLERMAN OF CLYDE MEETS A SMOOTH STRANGER.

AND IS RELIEVED OF \$200

Had Come to See His Wife at the Hospital—One Suspect Has Been Arrested.

William Ellerman of Clyde, who came to Maryville Sunday to see his wife, who is sick at St. Francis hospital and intending to take her back home Monday, was robbed Monday morning about 10 o'clock of about \$200 by a stranger.

Mr. Ellerman was in an intoxicated condition at the time, and he and a stranger, who was seen by a few, went from the saloon to the old Harrison Bros' barn on East Second street. The stranger took Mr. Ellerman there so he could lie down awhile, or at least he told Mr. Ellerman that. But after Ellerman had laid down the stranger took the roll of money from him and went down the street as fast as he could with Mr. Ellerman after him.

The robbery was reported to the police authorities, and Marshal Moberly went out at once for the stranger who was seen by John Borrusch. He arrested a man thought to have some connection with the affair in the Burlington yards, but when searched nothing was found, and he was not the same man that was with Ellerman, according to Mr. Borrusch. However, he will be held a few days.

Sheriff Tilson gave a description of the man over the telephone to several in the East part of the county, and there seems to be some chance to capture the stranger.

There will be additional police this week, and Maryville is going to be free of pickpockets and others of this kind, as all suspicious characters will be run out of town by the police authorities.

TWO DEATHS AT QUITMAN.

Father of Mrs. R. L. Bilby and Infant Daughter of Mr. and Mrs. George Williams.

The 3-months-old daughter of Mr. and Mrs. George Williams of Quitman died Saturday night at 8 o'clock, after a short illness. We did not learn the time for the funeral.

Alexander Miller, the father of Mrs. R. L. Bilby of Quitman, died Sunday at his daughter's home. Mr. Miller came on a visit to his daughter and her family about three weeks ago from western Kansas, where he had been making his home with a son, and was taken ill.

The funeral services will be held Wednesday morning at 11 o'clock at the daughter's home in Quitman. Burial will take place in Prairie Hill cemetery, in the York neighborhood east of Tarkio, where the deceased had been a resident for many years. He was born in Glasgow, Scotland, in 1831. He is survived by three sons, Alexander Miller of Lucas, Kan.; Jacob Miller of Ft. Dodge, Kan.; William Miller, address not known, and Mrs. R. L. Bilby.

Bert Clark of the New Leeper hotel at Chillicothe is in Maryville this week visiting his parents, Mr. and Mrs. A. T. Clark.

WAS BADLY BURNED

MRS. JAMES WELLS SERIOUSLY BURNED NEAR HOPKINS.

GASOLINE FOR COAL OIL

Was Building Fire and Explosion Followed—Fire Spread to House and Others Were Burned.

Mrs. James Wells, living six miles east of Hopkins, was seriously burned Monday morning at her home, six miles east of Hopkins by an explosion while starting a fire for breakfast. Her injuries are very serious and the physicians, Dr. Large and Dr. Kirk of Hopkins, entertain no hope for her recovery.

The accident happened while Mrs. Wells was building a fire in the cook stove. She sent her 10-year-old daughter out to get kerosene, and the little girl got gasoline instead, and when a match was put to the kindling over which the gasoline had been poured the flames leaped up, burning Mrs. Wells and also her little daughter.

The flames soon started the house on fire and some little damage was done to the residence before the fire was put out by Mr. Wells and others. Three rooms in the residence were damaged before the fire could be extinguished, and Mr. Wells and one son and little daughter were burned, but not severely. Their injuries are not as serious as are Mrs. Wells', who was given attention at once.

Miss Ethel Wells, who was home at the time, was not injured. Miss Wells is well known in Maryville, having visited and attended the Normal school here.

Left for Kirksville.

Mrs. George Merchant of Oxford, Ia., who has been a guest at the home of her sister-in-law, Mrs. John E. Cameron, for several days, went to Kirksville Monday for a visit before returning home. Her daughter, Miss Stella, is a new student at the State Normal.

Announce Daughter's birth.

Mr. and Mrs. Bert Hogue of Pickering announce the birth of a daughter Friday morning.

MRS. DOOLEY DEAD

AGED LADY DIED MONDAY MORNING AFTER LONG ILLNESS.

SHE WAS BORN IN IRELAND

Had Been a Resident of Maryville Since 1870—Funeral Arrangements Not Announced.

Mrs. S. V. Dooley, Sr., who had been a resident of Maryville since 1870, died at her home, 513 East First street, Monday morning at 7 o'clock, from an illness of paralysis and heart trouble that had confined her to her home since last May. She had revived at times since she was first taken ill, and was able to be about her room, but she had required constant care.

Mrs. Dooley was taken much worse a week ago Sunday, but it was not thought that death was so near until a few minutes before she passed away. Her son, Sylvester Dooley, Jr., station agent for the Burlington at Clarinda, Ia., visited his mother over Sunday and left on the early Wabash train for Clarinda. He was telegraphed for by the time he reached Burlington Junction and returned to the city on the 10:52 Wabash train.

The funeral arrangements have not yet been made.

Mrs. Dooley's maiden name was Hannah Washington, and she was born seventy-one years ago in Carlow county, Ireland. She is the last of her family in America and all her native country. Mrs. Dooley came to America with her parents, who settled at Peoria, Ill., and she grew to womanhood there. She was married to her husband February 7, 1862, at Peoria. They came to Maryville and settled in 1870, Mr. Dooley engaging in the grocery business. Ten children were born to them, three of whom survive, Sylvester Dooley of Clarinda, Miss Mamie Dooley of the Maryville public school faculty, and Miss Anna Dooley at home. All of the other children of the family died in childhood excepting one son, Richard, whose death occurred in 1890. He was a brilliant young man and was preparing to locate in Denver, Col. for the practice of law, when he was stricken with the disease that caused his death. Mrs. Dooley was so grieved over the loss of her son that her health was greatly affected and she had been subject to serious sick spells ever since. Mr. Dooley's death occurred in 1907.

STREET FAIR TOMORROW.

Everything is Ready and Good Weather is Promised.

Maryville's free street fair will open Tuesday in full blast, and everything will be in readiness by that time. However, a number of the paid shows will be given this evening, and the street lights will be on.

The weather report for this week says that pleasant weather is promised within the next few days, although no more hot weather is predicted for this season.

The vegetable and fruit exhibition tent, the poultry display tent, and the farm and home machinery tent are located on Third and Buchanan streets. Several have already sent in their exhibits. F. P. Robinson will have on exhibition in the building next to the postoffice some of his Poland-China hogs that took prizes at the Lincoln, Neb., state fair.

On Tuesday, the opening day, the automobile parade will be the main attraction. It will be given at 1:30 o'clock, and all car owners taking part should be at the light plant at 1 o'clock. It is expected that there will be fifty cars in the parade. Fifty dollars in four prizes will be given.

THE WEATHER

Generally fair tonight and Tuesday; Continued cool.

COMPULSORY LAW STRICT.

Every Child Between Eight and Sixteen Years of Age Must Attend School.

Every parent in Maryville ought to have a copy of the compulsory school law which is applicable to every public school in Missouri. Some of the main provisions of the new law are incorporated in the following paragraphs:

Every child between 8 and 14 years old and between 14 and 16, when not regularly employed, must attend some day school at least half of the term each year.

"No child can be excused on a promise to attend; he must attend first half of term, before being excused on that account.

"Courts having jurisdiction (justice of the peace in rural districts and in cities having less than 50,000 population) may excuse children from attending school for the following reasons: Parents cannot supply proper clothing, child is mentally or physically unable to attend, no public school in two and one-half miles of the home, labor of the child is necessary to support family, child has completed the school course.

"No child between 8 and 14 can be employed in a mine, factory, workshop or store unless excused statement from teacher that he has already attended half of the term for that year.

"It is the duty of attendance officers and district clerks to notify parents or guardians when children fail to comply with the provisions of the law.

"The penalty for non-attendance falls on parents or guardians, and it is a maximum fine, \$25, or imprisonment for ten days, one or both."

Children Dismissed at Franklin.

The pupils in Miss Cecile Benight's room at the Franklin ward school was dismissed Monday morning, owing to the room being damp and cold. The room has recently been papered. School was only dismissed here for a half day.

Breathe Hyomei and End Catarrh

If you really want to get rid of vile catarrh why not give Booth's HYOMEI treatment a fair trial.

The Orear-Henry Drug Co. is authorized to refund your money if you think you have not been benefited, and on that basis every catarrh victim in Maryville ought to start to banish catarrh this very day.

HYOMEI is a soothing healing antiseptic air made from Australian Eucalyptus and other antiseptics; it kills catarrh germs and contains no poisonous drugs. Simple instructions for use in each package. Complete outfit, \$1.00; extra bottles, 50c.

News of Society and Womens' Clubs

M. I. Circle Meeting.

The M. I. Circle will meet Tuesday afternoon with Mrs. Walter Mutz.

They Studied Parsifal.

The P. E. O. chapter met at the home of Miss Mabel Todd Saturday afternoon and began its study of grand opera, the course for the year just beginning including Parsifal, Martha, II Trovatore, the Bohemian Girl, Faust, Lohengrin, Tannhauser, and one comic opera, Madame Butterfly. Preceding the program, part 1 of the constitution of the supreme chapter was read and discussed. Miss Hettie Anthony gave a splendid story of Parsifal, and Miss May Anthony told of the life of the composer, Richard Wagner. Concluding the program was a vocal solo, "I Fear No Fate," by Mrs. J. E. Bailey. The next meeting of the chapter will be held with Mrs. O. C. Hanna on Saturday, September 28.

A Surprise Party.

A very pleasant and enjoyable surprise was given to Miss Ethel Cook on Sunday afternoon, it being her eighteenth birthday. The members of the Berean class of the M. E. church, South, Sunday school and several others were present. Games were played and several musical selections given by Miss Mary Ogden and Miss Cook and her sister, Miss Mabel Cook. The crowd met and went down to the Cook house from town in spite of the inclement weather. Those present were Misses Aileen Henderson, Neta Bugby, Mary Ogden, Anna Englemann, Beulah Mary, Mattie and Cassie Abshire, Katie Psandra, May Doran, Zenobia Wrightman, Eva Ashford, Will Burr, Mabel and Ethel Cook and John Gates.

HUNTERS BECOME RESTIVE.

Season for Ducks, Snipe, Geese and Brant Opened Sunday.

The season for hunting ducks, snipe, geese and brant opened Sunday, and will continue until April 30. Within the last week a large number of teal ducks have made their appearance on the lakes, ponds and streams in the vicinity of Maryville and hunters are becoming restive.

NOTICE OF FIRST MEETING OF CREDITORS.

In the district court of the United States for the western district of Missouri, St. Joseph division.

In the matter of Levenia J. Perry, bankrupt, in bankruptcy.

To the creditors of said bankrupt of Maryville, in the county of Nodaway and the district aforesaid.

Notice is hereby given that on the 13th day of September, 1912, the said Levenia J. Perry was duly adjudged a bankrupt, and that the first meeting of his said creditors will be held at my office in the city of St. Joseph, on the 28th day of September, 1912, at the hour of 10 o'clock a. m., at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

JOHN S. BOYER,
Referee in bankruptcy.

This 13th day of September, 1912.

The "Net"

Is the name of the big fifteen thousand dollar serial story which will appear in the Weekly Kansas City Star soon, for the newspaper rights of which the author received \$15,000. The story, pronounced the greatest this popular novelist has written, will not be published as a book until it has run serially in this newspaper.

The theme is the Italian Mafia, and against that sinister background the author has thrown the softer colors of an absorbing and fascinating love story. The story, while tragic in tone, has the humor, springiness and action that have characterized his previous successes.

"The Net" will be continued in liberal installments each week, with fifteen powerful illustrations by Howard Giles. The subscription price of the Weekly Kansas City Star is 25 cents a year.

Subscribe now and avoid missing a copy. Address the Weekly Kansas City Star, Kansas City, Mo.

Band Girls as Salesladies.

The members of the Missouri Ladies' Military band are not only furnishing music for the street fair, but they are also acting as special salesladies for the local groceries.

This week the band will receive from the manufacturers a commission for every package of Kellogg's toasted corn flakes sold. The young ladies will appreciate any order you may give them. If you don't see a band girl give your grocer the order and the girls will get the credit.

A marriage license was issued Saturday afternoon to Silas A. Gilbert and Barbara O. Clawson of Barnard.

PAPE'S DIAPEPSIN ENDS DIGESTION

Time It! No Sour, Gassy Stomach or Dyspepsia in Five Minutes.

You don't want a slow remedy when your stomach is bad—your stomach is too valuable; you mustn't injure it with drastic drugs.

Pape's Diapepsin is noted for its speed in giving relief; it's harmlessness; it's certain unfailing action in regulating sick, sour, gassy stomachs. It's millions of cures in indigestion, dyspepsia, gastritis and other stomach trouble has made it famous the world over.

Keep this perfect stomach doctor in your home—keep it handy—get a large fifty-cent case from any drug store, and then if anyone should eat something which doesn't agree with them; if what they eat lays like lead, ferments and sours and forms gas; causes headache, dizziness and nausea; eructations of acid and undigested food—remember as soon as Pape's Diapepsin comes in contact with the stomach all such distress vanishes. It's promptness, certainty and ease in overcoming the worst stomach disorders is a revelation to those who try it.

NEW YORK GETS KANSAS TWISTER

Left Trail of Death and Destruction for Ten Miles.

PROPERTY LOSS OVER \$250,000

Regulation "Funnel" Cloud Appears Without Warning—Long Branch Pleasure Seekers in Panic.

Syracuse, N. Y., Sept. 16.—Three persons were killed and 50 injured by a tornado which worked a ten-mile trail of destruction across the northern part of Onondaga county.

The property loss is estimated at \$250,000. The dead are: William Madison, Syracuse; J. Dopp, Fulton; Charles Chapman, Salina.

Struck Pleasure Resort.

Without any warning of its approach, the black, funnel shaped cloud first appeared near Long Branch, a pleasure resort ten miles from this city. About 400 persons were there and panic followed when building after building toppled over and two interurban trolley cars were hurled in a ditch.

A number of persons ran into the dance hall for safety, but this building was directly in the path of the storm and was demolished, many persons being injured.

Rushing westward, the tornado wrecked the boathouse of the Syracuse university navy in which was stored the entire crew equipment. All the shells were wrecked and the loss to the university is more than \$8,000. Racing across the country the tornado leveled everything in its path.

Fifteen Residences Wrecked.

North of North Syracuse the devastation continued. Hitters Hill was next visited and the settlement was practically wiped out, 15 residences, a number of barns and the school house falling before the wind.

The home of H. A. Wendel, which stood in the path of the tornado, was lifted from its foundation and turned completely over. In the house were Mrs. Wendel and her three boys, all of whom escaped uninjured.

Much other damage was done in the course of the storm, but wires are down and details unobtainable.

FREE APPLES FOR EVERYBODY

Growers in Kansas Propose to Set Apart a Day for Big Feast to School Children.

Topeka, Sept. 16.—An apple day this month, when every school boy and girl will be given free all they can eat, is the plan of C. C. Starr, superintendent of the schools. He is busy figuring how many apples the 12,000 youngsters can eat.

The suggestion was made by some of the Shawnee county apple growers. They are willing to supply the apples. The date has not been set because the farmers want to wait until the Jonathan apple, the favorite in this section, is ripe.

Missing Gun Men Taken.

New York, Sept. 16.—"Lefty" Louie and "Gyp the Blood," indicted for the actual murder of Herman Rosenthal, were arrested in an apartment at 156 Woodward avenue, Brooklyn, by central office detectives, and when brought to police headquarters by Deputy Commissioner Dougherty, admitted their identity.

Emporia Demands a Subway.

Emporia, Kan., Sept. 16.—The city of Emporia brought suit against the Atchison, Topeka & Santa Fe Railroad company to compel the company to construct a subway where it crosses Congress street.

POLICE SEIZED THE RED FLAG

NEW YORK OFFICERS FEARED W. W. RIOT.

Meeting Was Called to Protest Against Imprisonment of Lawrence, Mass., Strikers.

New York, Sept. 16.—Clashes between the police and the Industrial Workers of the World were averted with difficulty at the demonstration of protest against the further imprisonment of Ettor and Giovannitti, the Lawrence, Mass., labor leaders held here.

A red flag, carried by Fred Consiglio, was wrested from him by police. The marchers were so threatening that the police had their revolvers and riot sticks ready. The paraders were addressed by William D. Haywood, Ben Reitman, Miss Mary Dreier and others.

Miss Dreier, who is one of the best known workers in the cause for unionism for women said:

"You people are of that spirit of justice that fought our first revolution. This demonstration is one form of that spirit. Every man, woman and child in America must have justice."

Haywood, in his speech, said that, although the Massachusetts laws provide that no person accused of a crime shall be held longer than six months without trial, the Lawrence leaders have been in jail eight months.

Engelmann's Special Plant Sale

Street Fair Week, Sept. 16 to 21

Large Begonias, different varieties, 25c and 35c sizes, only 15c and 20c. Sam Schneider Arrested Again.

Sam Schneider of Arkoe was arrested Monday for disturbing the peace of Isaac Finch of that place on Saturday. This is the second charge of disturbing the peace against Schneider.

VERIFY IT.

The Proof is in Maryville, Almost at Your Door.

The public statement of a Maryville citizen is in itself strong proof for Maryville people, but confirmation strengthens the evidence.

Here is a Maryville citizen who testified years ago that Doan's Kidney Pills relieved sick kidneys and now states the cure was permanent. Can any sufferer from kidney ills ask better proof? You can investigate. The case is right at home.

Mrs. Mary Wood, 722 East Jenkins street, Maryville, Mo., says: "The public statements given by a member of our family on several occasions in favor of Doan's Kidney Pills were correct in every respect. We have Doan's Kidney Pills on hand all the time and use them whenever we find it necessary. We procured Doan's Kidney Pills at Love's drug store (now Love & Gough's drug store), and they brought great relief from kidney complaints."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Don't Fail to Visit

YOUNG SAILORS DROWN IN LAKE

Five Naval Apprentices Met Death in Chicago Storm.

BOAT SENT TO RESCUE CAPSIZED

Several Boys Unable to Swim, Became Seasick After Squall Struck—Five Others Still Missing.

Chicago, Sept. 16.—Five naval apprentices were drowned and five are missing as the result of the capsizing of a cutter from the United States naval training station at North Chicago, Ill., late in the afternoon. The bodies of five of the victims were recovered and identified and it is believed the five unaccounted for are drowned.

The dead are R. C. Harlan, I. L. Southworth, J. Wallace, J. A. Patton and W. N. Antrigue.

A. L. Raymond, one of the boys taken from the water, was resuscitated by a pulmonator after several hours.

From Western States.

The boys were between 16 and 20 years old and were from the Middle and Western states.

The cutter in which 24 apprentices went for a practice sail, was struck by a squall, and capsized within 200 feet of shore.

The party left the training station shortly after 2 o'clock in charge of Gunner's Mate Meagus, and after cruising about until 4 o'clock the cutter was headed for North Chicago. When the squall struck the boat the sails were lowered and an anchor was thrown into the water. Gunner's Mate Meagus, it is said, planned to let the cutter ride out the storm, but the waves soon were running so high that the boat dragged its anchor, and gradually was being driven on the beach.

Rescuers Had to Swim.

Capt. W. F. Fullam, commandant of the naval training station, saw the danger of the apprentices from his headquarters and sent a motor boat to the rescue, but this craft was capsized before it had gone far and the men in charge of it were obliged to swim back to the shore.

Later a force of men was sent along the shore to where the cutter had been wrecked, and every effort was made to rescue the apprentices. Many of the boys were able to swim ashore. Several floated ashore on oars and pieces of wreckage. A number were rescued from the surf by officers of the training station and cared for at houses near the scene of the wreck.

It is said several of the boys were unable to swim and became seasick soon after the squall struck the cutter. The boat in which the apprentices went for the practice sail had a capacity of 60 and was not overcrowded, according to the officers of the naval training station.

ANOTHER NOTCH IN SNEED'S GUN

Texas Banker Kills Al Boyce at Amarillo—Was Under Bond for Former Murder.

Amarillo, Tex., Sept. 16.—John Beall Sneed of Fort Worth, whose wife eloped to Canada last January with Al Boyce, shot and killed Boyce in front of the Methodist church. Sneed shot and killed Boyce's aged father in a hotel in Fort Worth last spring.

Sneed shot the older Boyce without warning. He killed the son the same way. Sneed, disguised in old overalls and a hunting coat, lay in wait with a shotgun at the church. As Boyce passed, Sneed stepped out and shot him. He was immediately arrested and placed in jail.

Sneed was tried at Fort Worth for the murder of the elder Boyce, but the jury could not agree. Pending a new trial he was out on bond. No one knew that Boyce was in this city. One rumor is that he had communicated with Mrs. Sneed and that he was decoyed back from Canada by a note from her.

NEGRO SHOT OKLAHOMA EDITOR

Assassin Fired From Ambush and Killed Frank Merrick of Guthrie.

Guthrie, Ok., Sept. 16.—Frank Merrick, 42 years old, a newspaper man here for 12 years, was shot from ambush and killed. Four bullets out of five took effect. The assassin stood behind a telegraph pole and killed Merrick as he walked by.

Four years ago Merrick accidentally shot and killed William Chadwick, a negro, in a saloon. Merrick was let off with a \$50 fine. Merrick was the son of Judge J. J. Merrick, former member of the Kansas and Oklahoma legislatures and author of many of the present Oklahoma laws.

Banks in a Merger.

St. Joseph, Mo., Sept. 16.—The Merchants bank and the First National bank of Buchanan county consummated a merger, and the business of the combined banks will be carried on at the home of and in the name of the First National bank. The Merchants is St. Joseph's oldest bank and the First National is the largest. Practically all the officers and employees of the two banks are retained in the consolidation.

GRAND DUKE DMITRI

Grand Duke Dmitri Pavlovitch, son of the Grand Duke Paul and cousin of the czar of Russia, is to wed the Grand Duchess Olga, eldest daughter of the czar. The grand duke was born December 6, 1891.

JOPLIN CAR STRIKE SETTLED

AFTER FOUR DAYS IDLENESS, AGREEMENT IS REACHED.

Men Won Principal Points of Their Demands and New Contract is Signed.

Joplin, Mo., Sept. 16.—After an idleness of four days, due to a strike of carmen and barn men, service on all lines of the Joplin & Pittsburg Railroad company was resumed at 4 o'clock.

A settlement of the differences between the employees and road management was effected within ten minutes after the executive committee of the union and W. A. Satterlee, general manager, met in conference, shortly after 3 o'clock.

The agreement calls for the reinstatement of an employee discharged because of refusal to operate a car beyond a limit placed by the union in Pittsburg, and also that he shall be given full pay from September 4, the date of his discharge.

Further, an armature winder's apprentice and a pit man's helper, who have been employed only parts of each day, shall be given employment at full time, same as is accorded other railroad shop employees.

The contract provides, also, that in future should differences arise between the company and the employees which cannot be settled by department heads, they shall be taken up by the union's executive committee and Mr. Satterlee, conferences to be held between the hours of 7 a. m. and 9 p. m.

A settlement of the controversy resulted after city officials of Pittsburg interceded, effecting two conferences between Mr. Satterlee and the strikers.

RIOT STARTS AT FOOTBALL GAME

Sixty Persons Seriously Injured When Hostile Flag Was Unfurled in Belfast.

Belfast, Ireland, Sept. 16.—A fierce fight was waged in the Celtic Park football grounds in which 60 persons were severely injured, two of them being in a critical condition. Five of the injured are suffering from shock.

The fight took place at half time in a game in the league series between the Belfast Celtic team and a team representing Linfield. Celtic supporters unfurled a green and white flag and started to parade. Linfield players displayed a Union Jack. Immediately stones, bricks, and clinkers were hurled through the air. The police were powerless. The opposing mobs, thousands strong, surged toward the playing field, where a regular battle was fought in full view of the spectators in the grandstand.

Revolver shots were fired, but police reinforcements arrived and separated the mob. Ambulances were summoned and started to remove the wounded lying on the field, some of whom were in a shocking state, covered with blood. Altogether 25 persons were taken to the hospitals.

Bugs Stop Cars.

Hutchinson, Kan., Sept. 16.—Street car traffic in the business district of Hutchinson was stopped an hour by the myriad of small bugs which swarmed around every electric light and piled an inch or more deep on the car tracks under each light. Motor men were unable to control their cars at the street corners, the wheels skidded along on the rails as they crushed the matting of bugs.

More High School Students.

Frankfort, Kan., Sept. 16.—The high schools of Marshall county all open with increased enrollments. There are in Marshall county nine high schools, maintaining two or more four year courses, one of which is the college preparatory. These schools operate under the provisions of the Barnes law, receiving county aid this year to the amount of \$26,000.

COLLISION IN MID-AIR FATAL

Crash of Racing Aeroplanes Brought Death to Aviator at Chicago.

DUE TO APPROACHING DARKNESS

Race Started by Club Officials in Face of Protests From French Participant—Accident Will Not Stop Meet.

Chicago, Sept. 16.—A collision between two racing aeroplanes at dusk brought death to Howard Gill of Baltimore and severe injury to George Mestach of France.

Two other aviators were up high and the eyes of the spectators at the time were watching the spectacular downward flight of Max Lillie, who had stopped his engine at an altitude of 2,500 feet. No one in the crowd saw the collision.

Mestach was going about a mile in two minutes and had gone only twice around the course when his monoplane and Gill's biplane came to the earth together. Just how they collided even Mestach, with his view obscured by his low seat in his cockpit, was unable clearly to explain.

Tried to Pass Under.

Timekeepers at the pylons nearest the spot said Mestach was in the lead and Gill, coming up faster from behind, at the turn tried to pass beneath Mestach. The two machines clashed, the wings became entangled, and both came to the ground.

From the judges' stand, half a mile away on the opposite side of the course, ambulances were rushed across the field. Both men were lying on the ground apparently dead. Gill in the wreckage of his machine, and Mestach a few feet away.

After being shaken, Mestach became conscious. Gill never regained consciousness. His chest had been crushed in by the weight of his engine. At the hospital it was found Mestach's head was cut, but his injuries were not dangerous.

Officials of the club said the meet would continue all next week regardless of accidents.

Caused by Darkness?

Darkness is said to be primarily the cause of the accident.

Mestach said just before the monoplane race was to start he protested to the officials of the Aero Club of Illinois against racing in the dark, but the start was called and he went up.

The accident happened, according to the technical committee, because the code of the air, directing that an aviator must pass another 150 feet above or below, or 75 feet to one side, was violated.

That death came to Gill and not Mestach, the committee adds, was because Gill rode in front of his machine, and was not strapped in, while Mestach was behind his motor, strapped.

HEAVY RAIN DERAILED A TRAIN

Washout Near Strasburg, Mo., Caused Seven Hours Delay—Two Passengers Injured.

Strasburg, Mo., Sept. 16.—Two persons were injured and seven carloads of Western mail and a burlesque show were detained seven hours as the result of the derailment of a Missouri Pacific passenger train two miles west of here. The engine and two cars bumped along the ties for 50 yards on account of spreading rails, caused by heavy rain.

Several passengers were slightly cut by broken glass. The engineer and fireman saved themselves by jumping.

The fast mail, due in Kansas City at 9:30 in the morning did not reach Kansas City until 4:30 in the afternoon. A penalty of \$500 must be paid by the railroad for every hour the fast mail is delayed.

DULUTH CAR STRIKE EXPENSIVE

Street Railway Company Paying Chicago Students \$25 Per Day to Operate Cars.

Duluth, Minn., Sept. 16.—Street railway service was resumed here, at 75 per cent of the cars being manned by strikebreakers. Not a brick was thrown. Sheriff Meining had men located at vital points ready to quell any disturbance begun by sympathizers with striking traction employees.

It was learned that part of the strikebreakers here are students of the University of Chicago. One of them said he and a large party of students came up to get the \$25 a day promised strikebreakers by the railway company.

Found a Candidate.

Jefferson City, Sept. 16.—The Republican congressional committee of this (the eighth) district held a meeting here and named D. W. Peterson of this city as their party candidate for congress. This nomination has been going begging for a month.

Found \$200 Pearl.

Sedalia, Mo., Sept. 16.—J. H. Newland, living seven miles from Sedalia, found a \$200 pink pearl in a mussel shell picked up in Muddy creek. Jewelers say the pearl is perfect. It weighed almost two carats.

RESTORE GRAY HAIR TO NATURAL COLOR

By Common Garden Sage a Simple Remedy for Dandruff, Falling, Faded, Gray Hair.

The old idea of using Sage for darkening the hair is again coming in vogue. Our grandmothers had dark, glossy hair at seventy-five, while our mothers are gray before they are fifty. Our grandmothers kept their hair soft and glossy with a "Sage Tea," which also restored the natural color.

One objection to using such a preparation was the trouble of making it. This objection has been overcome by the Wyeth Chemical Company of New York, who has placed on the market a superior preparation of Sage, combined with Sulphur and other valuable remedies for dandruff, itching scalp, and the weak, falling hair.

The beauty of the hair depends more on its richness, even shading than anything else. Don't have dry, harsh faded hair, when a simple, harmless remedy will bring back the color in a few days; and don't be tormented with dandruff, itching scalp and loose, falling hairs. Wyeth's Sage and Sulphur Hair Remedy will quickly correct these troubles, and give color, strength and beauty to your hair.

Get a fifty cent bottle from your druggist today, and prove this to your own satisfaction. All druggists sell it, under guarantee that the money will be refunded if the remedy is not exactly as represented. Agent Koch Pharmacy.

An Estate Farm for Sale

Consisting of 350 acres, located eight miles southwest of Maryville. All smooth prairie land, subject to cultivation, with the exception of 20 acres of timber land, all under same fence. An ideal stock farm. Within a half mile of farm a good school house. Well improved, large barn 60x80, hog houses, double corn cribs, good dwelling of six rooms, a good tenant 4-room house, one splendid well with windmill, one fountain or spring piped into cement tank. The farm lies in one body, but could be divided into three smaller farms to good advantage. Can be purchased for \$125 an acre if bought by December 1, 1912. Terms, cash.

Address all communications to Wm. Everhart, Maryville, Mo., or to Joseph Everhart, Pickering, Mo. JOSEPH AND WILLIAM EVERHART, Executors of the Estate.

F. R. Anthony, M. D. SPECIALIST.

Practice limited to diseases of the Eye, Ear, Nose and Throat, and general consultation. All phones. Office hours, 9 to 11 a. m.; 2 to 4 p. m.

MANY WINDOWS DECORATED.

The Drug Store Windows Are Nicely Decorated and Fixed Up.

Many store windows are nicely decorated this week for the fair. The store window in T. J. Parle's drug store, in street fair colors of purple and orange, is a very pretty window and the work was done by Frank Green.

Another store which is also very prettily decorated for the fair is that of the J. C. Ferritor drug store, on the north side of the square.

BAND STAND WILL BE USED.

While It Will Not Be Completed, Still It Will Be Ready for Use.

The new band stand in the court house yard is nearing completion, and by tonight it is expected that the railing will be finished. All that remains after the railing are the eight poles and the light fixtures, but that will not be up this week. The stand will be used this week and the public wedding to take place on Thursday afternoon will be held there.

Was at Arkoe.

Congressman Charles F. Booher of Savannah was at Arkoe Saturday to make a political talk, but owing to the rain and the few people present he did not speak. The rain put a damper on the picnic, and there were only a few that went to Arkoe Saturday. James Swinford and Lefe Stamper of this city were in that town Saturday taking in the picnic.

Normal Attendance 228.

The attendance at the Normal up to Monday noon was 228. The attendance at the term last fall was 236. It is expected that the enrollment will reach the 300 mark this term, as many are coming in this week.

Dr. Anthony at Home.

Dr. and Mrs. F. R. Anthony returned Monday morning from a four days' trip to St. Louis and South Bend, Ind. They visited Mrs. Anthony's parents, Mr. and Mrs. J. C. Mather, at South Bend.

H. A. Younke of Kansas City returned to his employment Saturday, after a two days' visit with his family, who are at the home of Mrs. Younke's parents, Mr. and Mrs. M. C. Baublitts.

Judge and Mrs. I. K. Alderman went to St. Joseph Monday morning to spend the day with their son, Dale V. Alderman, and Mrs. Alderman.

Mrs. Sylvester Dooley of Clarinda arrived Saturday on a visit to her parents, Professor and Mrs. B. F. Duncan.

Walter Wray left Monday for Columbia, where he will attend the state university this year.

Pompeian Venus is Unearthed.

One of the latest and most interesting things uncovered during the new excavations at Pompeii under the direction of Professor Spinazzola, is a fresco which is regarded as the best which has yet been found. It is very beautiful, and in a perfect state of preservation. It was one of the ornaments of the facade of a house situated in the main public thoroughfare, of which the roof was in an almost intact condition. It represents the Pompeian Venus standing erect, crowned with a diadem, in the midst of flying Cupids, on a chariot drawn by four Indian elephants. Seen from the front, the representation of these animals is strikingly realistic. The archaeological value of the fresco is extremely great, for the colors are very fresh and harmonious.

No Maltese Cats in Malta.

James Oliver Laing, American consul at Malta, informs the state department that many Americans have asked him to give names of breeders of pure blood Maltese terriers and cats. He says there are a few so-called Maltese terriers in Malta and they are not of pure blood. The puppies which the street hawkers offer for sale to tourists are more or less mongrel with a strain of the old breed. Maltese cats do not exist in Malta, at least not one of the color called Maltese in the United States, has been seen there.

Modern Morals.

"This latter-day or new morality is too lax for me." The speaker was Jerome S. McWade, the Duluth millionaire. He continued:

"This new morality, which seems in its tolerance rather to encourage than to oppose wickedness, reminds me of a lad in my Sunday school class. "Now, Tommy, I said to this lad one Sunday afternoon, 'now, Tommy, what must be do before our sins can be forgiven?' "We must sin,' Tommy replied."

Low Wages for Rescuers.

The appalling number of suicides in St. Petersburg has created a new occupation for the workless. Many watchers assemble every day on the banks of the Neva and the canals on the lookout for attempted suicides. For each rescue the "hero" receives \$2.50 from the prefecture of police. In one week one man made \$7.50 in this way.

CHIMNEYS OF COLONIAL DAYS

Fireplaces Played an Important Part in the Homes of the Early Colonials.

In America the early colonists had little use for the mason's art, except in the construction of the huge chimney stacks, which in any dwelling of considerable size and any pretensions to comfort formed a very considerable part of the structure. The great kitchen fireplace and oven, with smaller hearths in from two to four rooms on each floor, required a very considerable part of the material and skilled labor bestowed upon a colonial homestead in the more northern colonies.

In some sections where the dangers of an attack by Indian raiders were imminent, the wooden walls of the lower story inclosed a stout wall of brick or a kind of rubble masonry. Some of these buildings are still standing and inhabited, although dating back (at least so far as the lower stories are concerned) more than two centuries. A very few brick buildings have wholly or in part come down to us from the first years of colonization, and until within the last half century some that preserved the peculiar features of Elizabethan and Stuart types of dwelling and business structures. Much of the brick and about all the great flooring tiles and ornamental tiling were at first imported from Europe, but lime and brick of good quality were soon produced in almost every community.—National Magazine.

LINEN OVER 6,000 YEARS OLD

Fabric Found in Cemetery at Tarkhan as Fresh as When First Woven.

In one of the apartments at University college Prof. Flinders Petrie has placed on exhibition some remarkably interesting antiques unearthed at Tarkhan, Heliopolis and Memphis under the auspices of the British School of Archaeology in Egypt, says the Washington Herald.

The great cemetery of Tarkhan, which occupied a mile of desert 40 miles south of Cairo, and which dates from the earliest historic age until the race of the pyramid builders, has proved to be exceedingly prolific in antiquities. What has struck Prof. Petrie is the extraordinary preservation of the woodwork and clothing unearthed from these places of interment of long ago.

A great sheet of linen which is placed on exhibition is as fresh and as firm as when cut from the original cloth—and it is some 6,000 years old. So, likewise, with the woodwork, which in but few instances shows signs of decay. Here are boxes that served their purpose as funeral caskets, built of planks of acacia and shittim wood, and as firm and secure as when lowered into the bosom of the earth in firm antiquity.

Wandering Youth.

Sudden disappearances of men and women unhappily are a pronounced feature in the life of all great cities, but London has been the first of the world's maelstroms to attempt a tabulation and classification. Last year 2,676 women over sixteen years of age were swallowed up in the insatiable vortex of that metropolis without immediate trace. More startling and pregnant with thought to all who are concerned with the problem of safeguarding the young is that, during the same year, 1,118 girls between the ages of ten and sixteen were reported to the metropolitan police as missing. The ultimate tracing of these victims of the dangers of a large city to adolescent womanhood resulted in sad revelations to parents and friends. Some of the missing are still missing and will be. The moral is clear. He who runs may read. Watch, guide and help the youth, girls and boys, who have reached or passed the critical time of maturity. "The thoughts of youth are long, long thoughts."

Puzzles for Patients.

Although the patient had waited half an hour for her interview, the time had not dragged.

"I worked on one of those puzzles," she said. "By the way, doctor, you are not a children's specialist; then why do you keep so many puzzles in your reception room?"

"You answered your own question before you asked it," the doctor said. "I keep them to amuse the grown-ups. Most people who feel bad enough to visit a doctor can entertain themselves better with a puzzle than a book or magazine. Every puzzle that has achieved popularity in the last twenty-five years has a place in that cabinet. Dentists also rely on puzzles to keep their patients in good humor, for even toothache will share attention with a good puzzle."

Horses in the Glacial Epoch.

The opinion has been expressed that horses became extinct in the glaciated regions of North America, and probably in the whole continent, about the middle of the glacial epoch. It has been pointed out that all the apparently authentic discoveries of fossil horses in the United States east of the great plains fall into two sets of localities, one along the Atlantic and Gulf coasts and the other extended from New Jersey to South Dakota, the localities in the last set lying, with few exceptions, close to the southern border of the drift covered area. The earliest discovery of fossil horse remains was made near the Neversink Highlands.—Harper's Weekly.

PATHOS IN PARIS PAWNSHOP

French Marquise Bequeathes \$20,000 to Be Used to Redeem Pledges of the Poor.

The Marquise de Guerrey has bequeathed nearly \$20,000 to the city of Paris for the redemption of small objects pledged in the state pawnshops by the poor.

The legacy has its origin in a visit paid one day by the marquise to the chief depot of the Mont de Piete, as the state pawnbroking establishment is called in France, where her attention was attracted by a silver christening set, consisting of a knife, fork and spoon, such as is given to a child on its baptism or first communion. The set was furnished with age and the ticket showed it had been in pawn for half a century.

The marquise was told that regularly for many years since 1850, when the little christening gift was pawned, either the father or the mother of the recipient had come and paid the trifling interest on the pledge, doubtless a relic of a dead child. Each year the man or his wife was a little older, a little shabbier, a little sadder, but the interest was punctually paid.

Then the man ceased his annual visits and only the woman came, until she, too, failed to appear. Neither was ever seen again, and the little christening gift remained in its wrapping getting blacker and dustier until it was seen by the Marquise de Guerrey.

TO RESTORE GARDEN OF EDEN

Sentimental Feature Connected With Great Irrigation Project in Asiatic Turkey.

The restoration of the Garden of Eden is a sentimental feature of the great irrigation project by which Sir William Willcocks hopes to bring back the early fertility to a great region in Asiatic Turkey. The country bordering the lower Euphrates and Tigris rivers was long a center of prosperity and wealth. It was made to flourish by extensive irrigation works, the ruins of which still exist, but the land is now barren by drought, though much of it is swept by occasional floods. The engineers propose to reconstruct the ancient works on an enlarged and improved plan. They have found a depression in the desert, into which the overflow from the Euphrates can be led, and they expect to be able to regulate the Tigris, though this is a more difficult feat than the ancients never fully accomplished. The probable great productivity of the delta of the two rivers under suitable irrigation is indicated by analyses showing the soil to be richer than that of Egypt or the Sudan. It is believed that the Garden of Eden will be found just north of Ur, at the ancient junction of the Tigris and Euphrates. Ur is supposed to have been a maritime town, but its remains are now six miles west of the Euphrates and 125 miles from the sea.

Crawl on All Fours to Get Tall.

A man's organs and those of his bones which are not subjected to pressure grow continuously until he is forty years old; that is to say, the heart should become stronger, the capacity of the lungs increase, and the brain should develop steadily until the fourth decade of life. Also one should wear a larger hat at the age of forty than at thirty. A man ceases to grow tall, however, at the beginning of the third decade, because after that time the downward pressure exerted by the weight of the body while in the erect position compresses the vertebrae, or small bones in the spine, the discs of cartilage between them, the pelvis and the thigh bones, and this pressure overcomes the natural elasticity of the discs and the growth of these bones. However, a British scientist contends that were a man a quadruped and therefore freed from the downward pressure produced by his weight upon his spinal column, he would continue to grow in height for ten years longer than he does at present, since it has been found that bones not subjected to compression increase up to the fourth decade.

Lopping Off the Ends.

Robert Henri, the noted artist, was talking at a dinner in New York about the over-finished and banal work of painters of the Bouguereau type.

"Leighton, the English Bouguereau, met Whistler," said Mr. Henri, "one day in Piccadilly. The two men sauntered through the Burlington Arcade talking art."

"But, my dear Whistler," said Leighton, "you leave your work so rough, so sketchy! My dear Whistler, why do you never finish?"

"Whistler screwed his glass into his eye and gave a fiendish laugh.

"My dear Leighton," he said, "why do you ever begin?"

These Times.

Ex-Governor Pennypacker, discussing the divorce evil in Philadelphia, said with a smile:

"In these times one never, as the saying goes, knows where one is at. An acquaintance of mine extended his hand to me at the Historical society the other day and cried:

"Congratulate me! I am the happiest man alive!"

"I looked at him doubtfully.

"Engaged, married or divorced?" I asked."

Time to Quit.

"The kentry is going plumb to pot." "See here, Peleg. If you don't stop going around with such a long face, the barber is going to charge you extra for shaving you."

SPEAKING AS A FINE ART

Many Men Who Attempt to Address Audiences Cannot Make Themselves Heard.

Speaking is one of those arts which people seem to think it unnecessary to study and learn, and the probability is that most speakers of the kind mentioned are blissfully unaware of their inaudibility. Doubtless their voice resounds comfortably in the empty spaces of their own chest and head, and this prevents them from knowing that it does not penetrate to the auditory apparatus of other people.

To be a lecturer, it is not only necessary to know your subject, but the art of enunciation and audible delivery needs to be learned also. And the sound of one's voice in one's own ears is a most misleading guide. Such people ought to be trained by being made to read or speak from one end of a large room to somebody at the other end; when they would soon find out that tones which pass muster in a conversation are useless in a public speech.

In conversation we carelessly slur half our syllables, leaving our interlocutor to guess them from the context, but this will not do in a public speech, where people are too far off to catch the signs. Again, a word pronounced in the ordinary English way—of throwing a strong accent on a single syllable and slurring the other syllables—becomes reduced to a mere monosyllable when said in that manner in a large room.—Theosophical Path.

THINGS THAT COLOR THE SEA

Blueness of Waters of Old Ocean is in Constant Ratio to Its Saltiness.

It has been proven that the blueness of sea water is in constant ratio to its saltiness. In the tropics, the tremendous evaporation induced by the blazing sun causes the water to be much more salt than it is in higher altitudes. For about thirty degrees, both north and south of the equator, the waters of the world's oceans are of an exquisite azure. Beyond these latitudes the blue fades and changes to green, and in the Arctic and Antarctic oceans the greens are almost as vivid as the tropical blues. The extraordinary blueness of the Mediterranean has two causes; one is that very few large rivers of fresh water run into this sea; the second, the Mediterranean is practically land-locked, and, being exposed to a powerful sun, evaporation is great.

China's Yellow Sea is usually supposed to owe its origin to the flood of muddy water which its great rivers pour into it. But here living organisms are responsible for its peculiar tint.—The Sailor's Magazine.

Factory Lighting.

A special report on illumination in factories states that as regards artificial illumination there seems to be little to choose between lighting by electric glow lamps and by modern systems of incandescent gas. Electric light has the advantage of being constant and requiring little attention beyond the systematic dusting and renewal of lamps. The gas systems generally produce a whiter and more powerful light than electric current, but the units are apt to vary much in efficiency, owing to the liability of the mantle to deteriorate. Careful attention, therefore, is required to replace any that show signs of weakness. Electric light, of course, causes no vitiation of the atmosphere; but in the modern systems of gas lighting the amount of gas burnt is so a all and the combustion so complete that the effect on the air is minimized. For the perfect local lighting of any point of work the three following conditions must be fulfilled: (1) The illumination must be adequate, (2) "glare" effects must be absent, and (3) no troublesome shadows must be cast on the work.

World's Largest Index.

On Beacon Hill in Boston, under the golden dome of the state house, is one of the largest indexes in the world. In fact, the Russian public index is the only one known to be larger. More than nine million names, giving births, marriages and deaths in Massachusetts from 1843, make a complete record, showing not only where people were born and where they died, but also statistics which are vital in making up calculations. Before this time the records were kept in the different towns, but now they are all concentrated in the state house in Boston. In a relatively small space all these records are preserved, and as births, marriages and deaths come in, different forms of cards are used, and a great variety of names, Grecian, Assyrian, Italian, and others now mingle with good old New England names that have been on the records since the landing of the Mayflower.

The Camel's Peculiarity.

The camel alone among animals does not perspire with its entire skin. It perspires only in the back of the neck, and so when travelling in extreme heat does not require a continual supply of water in order to replace the moisture evaporated through the pores.

A curious consequence of this singularity is the fluctuation, within four degrees, of the blood temperature of a healthy camel. That is a rise of temperature of four degrees, which in a human being and in other mammals would be a sign of fever, is a normal function with the camel.

WANTS

Advertisements are inserted in this column at the rate of three lines (18 words) three days for 25 cents. For ads larger than three lines one cent extra will be charged for each word in excess of 18. Cash must accompany order for these small amounts.

FOR SALE—Five-room home, five blocks from square, electric lights, city water, sewer connections, large cemented basement, cement walks, good well, everything in first class condition. If you want a good house in a good location investigate this. Will sell at a sacrifice if taken before Oct. 1, 1912. Inquire at Democrat-Forum office.

WANTED—Girl at Maryville Ste Laundry. 2-11

BOARD AND ROOM—For boys at Seminary Hall, \$3.50 per week. 13-16

Only an Inch of Rain.

Rain fell in Maryville and over the county on Saturday, and the rainfall in Maryville amounted to 1.06 inches.

Mrs. Hubert Wagner, living north of Maryville, was brought to St. Francis hospital Friday night for treatment.

All Maryville Unites in Extending a Cordial Invitation to You All to Come to Her Fall Festival This Week

TIME TO GATHER IT

PICK OUT YOUR SEED EARS OF CORN WHILE IN FIELD.

BEFORE CORN IS INJURED

Then Hang It Up to Dry Out, Says S. M. Jordan, and You Will Raise More on Every Acre.

Right now is the time in most fields for gathering next season's seed corn, says S. M. Jordan, manager of the Pettis county bureau of agriculture.

It has been rarely seen that corn has ripened up in such fine condition, and since there has been nothing to possibly injure the seed quality, this seed should be gathered now, and if hung up and well dried out before cold weather the best of results should follow. It is very certain that finer seed quality was never known in Pettis county, nor in any other county, than we have this year, and all possible care should be given it.

Weak seed may grow but strong seed will grow better, and the quality of the seed can be assured for next spring, and if any farmer plants poor seed next spring it will be entirely due to his own neglect.

Seed should be gathered as soon as the first ears ripen, and these first ripening ears should be the only ones saved for seed. It will be found that such ears as ripen first are nearly always good ears, commonly found low on good stalks, and the rule should be: Select the earliest ripening ears that have good size and that grow on short jointed stalks, that have good brace roots, and the ear, when fully ripe, should hang with point somewhat downward.

More can be learned about the producing value of a seed ear by the stalk than can be learned from the ear. A short jointed stalk means an extensive blade system, and the brace roots tell much of the extent of the root system. Keep this in mind and the reasons will be easy.

The leaf and the root system of plants correspond exactly to the lungs and digestive organs of animals, and no animal can be a good one if it has poor lungs or poor organs of digestion, and it is just as reasonable that a plant cannot grow a good producing ear if it has a small leaf system or a small root system.

When this seed is gathered and carried in from the fields it should at once be hung in a dry, well ventilated place, not over stock, as the breath of stock in winter will damage the seed. It should be kept unshelled until near the time to plant.

In many corn fields over the state one man can secure in one day 1,000 such ears, and these should plant nearly 100 acres. Corn selected in the above manner and rightly stored will make from one to five bushels more per acre, at least than the crib-seed that so many plant. If it makes but one more bushel per acre on the 1,000 ears that can be secured in one day it will mean from \$50 to \$250 for the day's work. If all farmers would save seed in this manner and would get five bushels more per acre in Nodaway county, at 60c a bushel it would bring about \$300,000 more money—enough to build about 100 miles of rock roads.

This is not intended to convey some information that a farmer does not have, but simply as a reminder to do what we all know is the right thing to do.

Has Some Fine Corn.

S. S. Webb of Burlington Junction was in Maryville Monday with ten ears of fine Yellow Dent corn that he raised this year. He will have it on exhibition at the fair.

Henry Westfall returned Saturday night from a three weeks' western trip to Wyoming and Montana.

DO YOU NEED GLASSES?

Eyes Tested Free

Glasses Accurately Fitted by expert Optician. Repairs Promptly Executed at CRANE'S.

ON THIS DAY 31 YEARS AGO.

Snow Fell in Maryville, According to James Fraser, an Old Settler.

James Fraser of this city said Monday that thirty-one years ago today, or September 16, 1881, snow fell in this community, and would have made six inches of snow if it hadn't been for the warm ground. The weather was very chilly and cool, and Mr. Fraser says he remembers that he was buying stock near Clyde on that day. He had on only a linen coat and when the snow and cold wave came he purchased an overcoat at Clyde to keep harm.

A Son at Butler Home.

Mr. and Mrs. Leo Butler of this city announce the birth of a son on Sunday.

F. M. PETTY IS DEAD

PROMINENT MERCHANT PASSED AWAY EARLY MONDAY.

HE HAD CANCER OF LIVER

Funeral Services Will Be Held at the Presbyterian Church Wednesday at 3 o'clock.

Mr. F. M. Petty, for twenty-eight years a Maryville merchant, passed away at his home Monday morning at 4 o'clock. Although it was generally known that Mr. Petty could not survive many days, his death at this time was a surprise even to his physicians.

Mr. Petty's affliction was cancer of the liver. He had never known a day's sickness in his life, excepting a light attack of grip a number of years ago from which he fully recovered, until two years ago, when his health began to fail. He did not suffer from his illness, and only regarded it a weakness that he would surely be able to overcome. But his weakness was due to troubling over the continued failing condition of business matters, over which he had no control, and he finally gave up the fight three weeks ago and went to a physician to see what was the matter that he could not gain strength. Four physicians pronounced his condition beyond remedy, and it was the first that he or any member of his family knew that he was seriously ill.

Mr. Petty set to work at once to clear up his business matters the best he could, and ordered a foreclosure. He did not complain, but proceeded in his usual manly way to leave everything in the best shape possible for his creditors.

An unusually sad thing about Mr. Petty's death is that his daughter Hazel, who was married the 15th of June last to Rev. Joel Babcock Hayden, and are now in Europe on their honeymoon, does not yet know of her father's sickness and death, and it is not now known where they are. It is believed that a letter will be received from Algiers a few days since to Mrs. Hayden's little niece, Virginia Curfman.

Letters three weeks ago and a cablegram several days ago were sent to her, but no word has come from them, so it is thought they have been far inland. Their honeymoon trip was to continue until the first of January, when they would settle in Poland for a two years' study of sociological conditions.

Mrs. Petty will not send a cablegram to her daughter announcing the father's death, as she thinks the shock would prove too much for her but with the messages already gone and the letters that will follow the news of his death will not come so severe. It will indeed be hard news to hear—the first since she left home. But what a memory will be hers! His Christian life and parting words with her in a prayer to God for her safe keeping and future usefulness as the wife of a minister. Better such a memory as that than a legacy of millions without it.

Frederick McHendrey Petty was born in Sheboygan, Wis., on the 4th day of June, 1851. When he was a small child his parents moved to Rut-

EVENTS OF MARYVILLE'S BIG WEEK

DAILY AND NIGHTLY FEATURES

Free attractions every hour during the afternoon and evening by the Roman Classical Posing People, the Quintet Bicycle People, the Four Air Flying DeAllens, and the Cornallis Famous American Acrobats. Music by the Maryville Concert Band of twenty-five pieces and Miss Alma Nash's Ladies' Military Band of thirty-five pieces.

Some of the pay attractions are as follows: Frontier Show, Plantation Show of twelve colored people, All-Star Vaudeville and Comedy Show, in which Captain Woolridge, the world's greatest detective and lecturer, will appear; Prof. James' All-Star Stadium Show, Grace Russell Ladies' Minstrels, Charles McDonald's den of reptiles and the largest man living, Nine's "Three-in-One," featuring the largest boy in the world and snakes from all nations; Baskins, presenting the original Royal Ruby, America's foremost art model, supported by a troupe of Persian musicians; Thomas' big Electric Carry-Us-All and a Merry-Go-Round.

SPECIAL FEATURES.

Fruit and vegetable exhibition, a display of farm and home machinery and implements, and the poultry show and exhibition.

WEEK'S FEATURES.

TUESDAY—Old Settlers' and Old Soldiers' Day. Automobile parade at 1:30 o'clock in the afternoon.

WEDNESDAY—Horse and Mule Show in the morning only.

THURSDAY—Horse and Mule Show in the morning; public wedding on the new band stand in the court house yard at 2:30 in the afternoon.

FRIDAY—Fraternal parade in the evening.

SATURDAY—Shetland Pony Show in the morning; Children's Carnival Parade at 2:30 o'clock in the afternoon, with Sylvia Frazer as Queen, heading the parade.

GENERAL INFORMATION.

An information bureau will be located in a booth in front of the court house yard on the west side, where all questions that can will be answered.

land, Vt., and a few years later to Fremont, O. When Mr. Petty was 14 years old his mother died and the family moved to Geneseo, Ill., where he grew to young manhood, receiving most of his education at the college at Henry, Ill. The family then moved to Eldora, Ia., where Mr. Petty went into the dry goods business, and was successful.

On March 2, 1876, he married Miss Lizzie Smith of Eldora, who survives him with two daughters, Nellie, the wife of Roy Curfman of the Curfman Brothers Lumber company of this city, and Hazel, wife of Rev. Joel Babcock Hayden, recently of Reading, Pa. Mr. and Mrs. Petty were bereaved of their eldest child.

In 1884 Mr. and Mrs. Petty moved to Maryville. Mr. Petty purchased the dry goods business of John Lieber, who at that time was regarded as Maryville's most successful merchant. He wished to retire after long years in that business, and waited until he found a capable young man whom he thought would continue the business and be a worthy successor. He made no mistake in his choice, for the gentlemanly, quiet, yet vigorous young man proved every minute of the twenty-eight years that followed an uprightness in business and social qualities that could not be excellent anywhere.

Mr. Petty was converted and united with the First Presbyterian church of this city in 1887. He was made an elder in the church the same year and held that office until his death. He was superintendent of the Sunday school for many years until a few months ago, when he gave it up on account of physical weakness, and also, taught in the Sunday school. He was a great lover of music, a fine singer, and had been a member of the choir since he came to Maryville. He started the young people's movement in the church before the Christian Endeavor was organized, and had worked for many years toward the establishment of a Y. M. C. A. in Maryville. It is safe to say that Mr. Petty has had a hand in everything that was intended to Christianize the sentiment of our city. He was indeed a good man and all our people mourn his death.

He leaves three brothers and one sister. They are Edwin J. Petty of Curtis, Neb.; C. E. Petty of Eldorado, Ia.; H. G. Petty of Ft. Collins, Col., and Don C. Petty in California, and Mrs. William Junkin of Chariton, Ia.

He leaves three brothers and one sister. They are Edwin J. Petty of Curtis, Neb.; C. E. Petty of Eldorado, Ia.; H. G. Petty of Ft. Collins, Col., and Don C. Petty in California, and Mrs. William Junkin of Chariton, Ia.

WAS BADLY BURNED

MRS. JAMES WELLS SERIOUSLY BURNED NEAR HOPKINS.

GASOLINE FOR COAL OIL

Was Building Fire and Explosion Followed—Fire Spread to House and Others Were Burned.

Mrs. James Wells, living six miles east of Hopkins, was seriously burned Monday morning at her home, six miles east of Hopkins by an explosion while starting a fire for breakfast. Her injuries are very serious and the physicians, Dr. Large and Dr. Kirk of Hopkins, entertain no hope for her recovery.

The accident happened while Mrs. Wells was building a fire in the cook stove. She sent her 10-year-old daughter out to get kerosene, and the little girl got gasoline instead, and when a match was put to the kindling over which the gasoline had been poured the flames leaped up, burning Mrs. Wells and also her little daughter.

The flames soon started the house on fire and some little damage was done to the residence before the fire was put out by Mr. Wells and others. Three rooms in the residence were damaged before the fire could be extinguished, and Mr. Wells and one son and little daughter were burned, but not severely. Their injuries are not as serious as Mrs. Wells', who was given attention at once.

Miss Ethel Wells, who was home at the time, was not injured. Miss Wells is well known in Maryville, having visited and attended the Normal school here.

Left for Kirksville.

Mrs. George Merchant of Oxford, Ia., who has been a guest at the home of her sister-in-law, Mrs. John E. Cameron, for several days, went to Kirksville Monday for a visit before returning home. Her daughter, Miss Stella, is a new student at the State Normal.

Announce Daughter's Birth.

Mr. and Mrs. Bert Hogue of Pickering announce the birth of a daughter Friday morning.

ONLY HAD 417 AT SUNDAY SCHOOL

Sunday Was Rally Day for the Sunday School of the First M. E. Church.

An attendance of 417 was present at the rally day of the First M. E. church Sunday school Sunday morning. This is the largest attendance ever present at the Sunday school in this church, according to W. F. Smith, who is superintendent of the Sunday school. The average attendance for this Sunday school during the last quarter was 277.

At this church Sunday morning there were also eight automobiles along the church sidewalk. The church is urging the members that have cars to join the Methodist Episcopal Auto club and to see how many cars they can line up in front of the church.

ROBBED OF HIS ROLL

WILLIAM ELLERMAN OF CLYDE MEETS A SMOOTH STRANGER.

AND IS RELIEVED OF \$200

Had Come to See His Wife at the Hospital—One Suspect Has Been Arrested.

William Ellerman of Clyde, who came to Maryville Sunday to see his wife, who is sick at St. Francis hospital and intending to take her back home Monday, was robbed Monday morning about 10 o'clock of about \$200 by a stranger.

Mr. Ellerman was in an intoxicated condition at the time, and he and a stranger, who was seen by a few, went from the saloon to the old Harrison Bros' barn on East Second street. The stranger took Mr. Ellerman there so he could lie down awhile, or at least he told Mr. Ellerman that. But after Ellerman had laid down the stranger took the roll of money from him and went down the street as fast as he could with Mr. Ellerman after him.

The robbery was reported to the police authorities, and Marshal Moberly went out at once for the stranger who was seen by John Borrusch. He arrested a man thought to have some connection with the affair in the Burlington yards, but when searched nothing was found, and he was not the same man that was with Ellerman, according to Mr. Borrusch. However, he will be held a few days.

Sheriff Tilson gave a description of the man over the telephone to several in the East part of the county, and there seems to be some chance to capture the stranger.

There will be additional police this week, and Maryville is going to be free of pickpockets and others of this kind, as all suspicious characters will be run out of town by the police authorities.

TWO DEATHS AT QUITMAN.

Father of Mrs. R. L. Bilby and Infant Daughter of Mr. and Mrs. George Williams.

The 3-months-old daughter of Mr. and Mrs. George Williams of Quitman died Saturday night at 8 o'clock, after a short illness. We did not learn the time for the funeral.

Alexander Miller, the father of Mrs. R. L. Bilby of Quitman, died Sunday at his daughter's home. Mr. Miller came on a visit to his daughter and her family about three weeks ago from western Kansas, where he had been making his home with a son, and was taken ill.

The funeral services will be held Wednesday morning at 11 o'clock at the daughter's home in Quitman. Burial will take place in Prairie Hill cemetery, in the York neighborhood, east of Tarkio, where the deceased had been a resident for many years. He was born in Glasgow, Scotland, in 1831. He is survived by three sons, Alexander Miller of Lucas, Kan.; Jacob Miller of Ft. Dodge, Kan.; William Miller, address not known, and Mrs. R. L. Bilby.

Bert Clark of the New Leeper hotel at Chillicothe is in Maryville this week visiting his parents, Mr. and Mrs. A. T. Clark.

MRS. DOOLEY DEAD

AGED LADY DIED MONDAY MORNING AFTER LONG ILLNESS.

SHE WAS BORN IN IRELAND

Had Been a Resident of Maryville Since 1870—Funeral Arrangements Not Announced.

Mrs. S. V. Dooley, Sr., who had been a resident of Maryville since 1870, died at her home, 513 East First street, Monday morning at 7 o'clock, from an illness of paralysis and heart trouble that had confined her to her home since last May. She had revived at times since she was first taken ill, and was able to be about her room, but she had required constant care.

Mrs. Dooley was taken much worse a week ago Sunday, but it was not thought that death was so near until a few minutes before she passed away. Her son, Sylvester Dooley, Jr., station agent for the Burlington at Clarinda, Ia., visited his mother over Sunday and left on the early Wabash train for Clarinda. He was telegraphed for by the time he reached Burlington Junction and returned to the city on the 10:52 Wabash train.

The funeral arrangements have not yet been made.

Mrs. Dooley's maiden name was Hannah Washington, and she was born seventy-one years ago in Carlow county, Ireland. She is the last of her family in America and all her native country. Mrs. Dooley came to America with her parents, who settled at Peoria, Ill., and she grew to womanhood there. She was married to her husband February 7, 1862, at Peoria. They came to Maryville and settled in 1870, Mr. Dooley engaging in the grocery business. Ten children were born to them, three of whom survive, Sylvester Dooley of Clarinda, Miss Mamie Dooley of the Maryville public school faculty, and Miss Anna Dooley at home. All of the other children of the family died in childhood excepting one son, Richard, whose death occurred in 1890. He was a brilliant young man and was preparing to locate in Denver, Col. for the practice of law, when he was stricken with the disease that caused his death. Mrs. Dooley was so grieved over the loss of her son that her health was greatly affected and she had been subject to serious sick spells ever since. Mr. Dooley's death occurred in 1907.

STREET FAIR TOMORROW.

Everything is Ready and Good Weather is Promised.

Maryville's free street fair will open Tuesday in full blast, and everything will be in readiness by that time. However, a number of the paid shows will be given this evening, and the street lights will be on.

The weather report for this week says that pleasant weather is promised within the next few days, although no more hot weather is predicted for this season.

The vegetable and fruit exhibition tent, the poultry display tent, and the farm and home machinery tent are located on Third and Buchanan streets. Several have already sent in their exhibits. F. P. Robinson will have on exhibition in the building next to the postoffice some of his Poland-China hogs that took prizes at the Lincoln, Neb., state fair.

On Tuesday, the opening day, the automobile parade will be the main attraction. It will be given at 1:20 o'clock, and all car owners taking part should be at the light plant at 1 o'clock. It is expected that there will be fifty cars in the parade. Fifty dollars in four prizes will be given.

THE WEATHER

Generally fair tonight and Tuesday; Continued cool.

YOUNG SAILORS DROWN IN LAKE

Five Naval Apprentices Met Death in Chicago Storm.

BOAT SENT TO RESCUE CAPSIZED

Several Boys Unable to Swim, Became Seasick After Squall Struck—Five Others Still Missing.

Chicago, Sept. 16.—Five naval apprentices were drowned and five are missing as the result of the capsizing of a cutter from the United States naval training station at North Chicago, Ill., late in the afternoon. The bodies of five of the victims were recovered and identified and it is believed the five unaccounted for are drowned.

The dead are R. C. Harlan, 1. L. Southworth, J. Wallace, J. A. Patton and W. N. Antrigus.

A. L. Raymond, one of the boys taken from the water, was resuscitated by a pulmonologist after several hours.

From Western States.
The boys were between 16 and 20 years old and were from the Middle and Western states.

The cutter in which 24 apprentices went for a practice sail, was struck by a squall, and capsized within 200 feet of shore.

The party left the training station shortly after 2 o'clock in charge of Gunner's Mate Meagus, and after cruising about until 4 o'clock the cutter was headed for North Chicago.

When the squall struck the boat the sails were lowered and an anchor was thrown into the water. Gunner's Mate Meagus, it is said, planned to let the cutter ride out the storm, but the waves soon were running so high that the boat dragged its anchor, and gradually was being driven on the beach.

Rescuers Had to Swim.
Capt. W. F. Fullam, commandant of the naval training station, saw the danger of the apprentices from his headquarters and sent a motor boat to the rescue, but this craft was capsized before it had gone far and the men in charge of it were obliged to swim back to the shore.

Later a force of men was sent along the shore to where the cutter had been wrecked, and every effort was made to rescue the apprentices. Many of the boys were able to swim ashore. Several floated ashore on oars and pieces of wreckage. A number were rescued from the surf by officers of the training station and cared for at houses near the scene of the wreck.

It is said several of the boys were unable to swim and became seasick soon after the squall struck the cutter. The boat in which the apprentices went for the practice sail had a capacity of 60 and was not overcrowded, according to the officers of the naval training station.

ANOTHER NOTCH IN SNEED'S GUN

Texas Banker Kills Al Boyce at Amarillo—Was Under Bond for Former Murder.

Amarillo, Tex., Sept. 16.—John Beall Sneed of Fort Worth, whose wife eloped to Canada last January with Al Boyce, shot and killed Boyce in front of the Methodist church. Sneed shot and killed Boyce's aged father in a hotel in Fort Worth last spring.

Sneed shot the older Boyce without warning. He killed the son the same way. Sneed, disguised in old overalls and a hunting coat, lay in wait with a shotgun at the church. As Boyce passed, Sneed stepped out and shot him. He was immediately arrested and placed in jail.

Sneed was tried at Fort Worth for the murder of the elder Boyce, but the jury could not agree. Pending a new trial he was out on bond. No one knew that Boyce was in this city. One rumor is that he had communicated with Mrs. Sneed and that he was decoyed back from Canada by a note from her.

NEGRO SHOT OKLAHOMA EDITOR

Assassin Fired From Ambush and Killed Frank Merrick of Guthrie.

Guthrie, Ok., Sept. 16.—Frank Merrick, 42 years old, a newspaper man here for 12 years, was shot from ambush and killed. Four bullets out of five took effect. The assassin stood behind a telegraph pole and killed Merrick as he walked by.

Four years ago Merrick accidentally shot and killed William Chadwick, a negro, in a saloon. Merrick was let off with a \$50 fine. Merrick was the son of Judge J. J. Merrick, former member of the Kansas and Oklahoma legislatures and author of many of the present Oklahoma laws.

Banks in a Merger.
St. Joseph, Mo., Sept. 16.—The Merchants bank and the First National bank of Buchanan county consummated a merger, and the business of the combined banks will be carried on at the home of and in the name of the First National bank. The Merchants is St. Joseph's oldest bank and the First National is the largest. Practically all the officers and employees of the two banks are retained in the consolidation.

More High School Students.
Frankfort, Kan., Sept. 16.—The high schools of Marshall county all open with increased enrollments. There are in Marshall county nine high schools, maintaining two or more four year courses, one of which is the college preparatory. These schools operate under the provisions of the Barnes law, receiving county aid this year to the amount of \$26,000.

GRAND DUKE DMITRI

Grand Duke Dmitri Pavlovitch, son of the Grand Duke Paul and cousin of the czar of Russia, is to wed the Grand Duchess Olga, eldest daughter of the czar. The grand duke was born December 6, 1891.

JOPLIN CAR STRIKE SETTLED

AFTER FOUR DAYS IDLENESS, AGREEMENT IS REACHED.

Men Won Principal Points of Their Demands and New Contract Is Signed.

Joplin, Mo., Sept. 16.—After an idleness of four days, due to a strike of carmen and barn men, service on all lines of the Joplin & Pittsburg Railroad company was resumed at 4 o'clock.

A settlement of the differences between the employees and road management was effected within ten minutes after the executive committee of the union and W. A. Satterlee, general manager, met in conference, shortly after 3 o'clock.

The agreement calls for the reinstatement of an employee discharged because of refusal to operate a car beyond a limit placed by the union in Pittsburg, and also that he shall be given full pay from September 4, the date of his discharge.

Further, an armature winder's apprentice and a pit man's helper, who have been employed only parts of each day, shall be given employment at full time, same as is accorded other railroad shop employees.

The contract provides, also, that in future should differences arise between the company and the employees which cannot be settled by department heads, they shall be taken up by the union's executive committee and Mr. Satterlee, conferences to be held between the hours of 7 a. m. and 9 p. m.

A settlement of the controversy resulted after city officials of Pittsburg interceded, effecting two conferences between Mr. Satterlee and the strikers.

RIOT STARTS AT FOOTBALL GAME

Sixty Persons Seriously Injured When Hostile Flag Was Unfurled in Belfast.

Belfast, Ireland, Sept. 16.—A fierce fight was waged in the Celtic Park football grounds in which 60 persons were severely injured, two of them being in a critical condition. Five of the injured are suffering from shot wounds.

The fight took place at half time in a game in the league series between the Belfast Celtic team and a team representing Linfield. Celtic supporters unfurled a green and white flag and started to parade. Linfield players displayed a Union Jack. Immediately stones, bricks and clinkers were hurled through the air. The police were powerless. The opposing mobs, thousands strong, surged toward the playing field, where a regular battle was fought in full view of the spectators in the grandstand.

Revolver shots were fired, but police reinforcements arrived and separated the mob.

Ambulances were summoned and started to remove the wounded lying on the field, some of whom were in a shocking state, covered with blood. Altogether 25 persons were taken to the hospitals.

Bugs Stop Cars.

Hutchinson, Kan., Sept. 16.—Street car traffic in the business district of Hutchinson was stopped an hour by the myriad of small bugs which swarmed around every electric light and piled an inch or more deep on the car tracks under each light. Motorists were unable to control their cars at the street corners, the wheels skidded along on the rails as they crushed the matting of bugs.

Found a Candidate.
Jefferson City, Sept. 16.—The Republican congressional committee of this (the eighth) district held a meeting here and named D. W. Peterson of this city as their party candidate for congress. This nomination has been going begging for a month.

Found \$200 Pearl.
Sedalia, Mo., Sept. 16.—J. H. Newland, living seven miles from Sedalia, found a \$200 pink pearl in a mussel shell picked up in Muddy creek. Jewelers say the pearl is perfect. It weighed almost two carats.

COLLISION IN MID-AIR FATAL

Crash of Racing Aeroplanes Brought Death to Aviator at Chicago.

DUE TO APPROACHING DARKNESS

Race Started by Club Officials in Face of Protests From French Participant—Accident Will Not Stop Meet.

Chicago, Sept. 16.—A collision between two racing aeroplanes at dusk brought death to Howard Gill of Baltimore and severe injury to George Mestach of France.

Two other aviators were up high and the eyes of the spectators at the time were watching the spectacular downward flight of Max Lillie, who had stopped his engine at an altitude of 2,500 feet. No one in the crowd saw the collision.

Mestach was going about a mile in two minutes and had gone only twice around the course when his monoplane and Gill's biplane came to the earth together. Just how they collided even Mestach, with his view obscured by his low seat in his cockpit, was unable clearly to explain.

Tried to Pass Under.
Timekeepers at the pylons nearest the spot said Mestach was in the lead and Gill, coming up faster from behind, at the turn tried to pass beneath Mestach. The two machines clashed, the wings became entangled, and both came to the ground.

From the judges' stand, half a mile away on the opposite side of the course, ambulances were rushed across the field. Both men were lying on the ground apparently dead. Gill in the wreckage of his machine, and Mestach a few feet away.

After being shaken, Mestach became conscious. Gill never regained consciousness. His chest had been crushed in by the weight of his engine. At the hospital it was found Mestach's head was cut, but his injuries were not dangerous.

Officials of the club said the meet would continue all next week regardless of accidents.

Caused by Darkness?
Darkness is said to be primarily the cause of the accident.

Mestach said just before the monoplane race was to start he protested to the officials of the Aero Club of Illinois against racing in the dark, but the start was called and he went up.

The accident happened, according to the technical committee, because the code of the air, directing that an aviator must pass another 150 feet above or below, or 75 feet to one side, was violated.

That death came to Gill and not Mestach, the committee adds, was because Gill rode in front of his machine, and was not strapped in, while Mestach was behind his motor, strapped.

HEAVY RAIN DERAILED A TRAIN

Washout Near Strasburg, Mo., Caused Seven Hours Delay—Two Passengers Injured.

Strasburg, Mo., Sept. 16.—Two persons were injured and seven carloads of Western mail and a burlesque show were detained seven hours as the result of the derailment of a Missouri Pacific passenger train two miles west of here. The engine and two cars bumped along the ties for 50 yards on account of spreading rails, caused by heavy rain.

Several passengers were slightly cut by broken glass. The engineer and fireman saved themselves by jumping.

The fast mail, due in Kansas City at 9:30 in the morning did not reach Kansas City until 4:30 in the afternoon. A penalty of \$500 must be paid by the railroad for every hour the fast mail is delayed.

Duluth, Minn., Sept. 16.—Street railway service was resumed here, at least 75 per cent of the cars being manned by strikebreakers. Not a brick was thrown. Sheriff Meining had men located at vital points ready to quell any disturbance begun by sympathizers with striking traction employees.

It was learned that part of the strikebreakers here are students of the University of Chicago. One of them said he and a large party of students came up to get the \$25 a day promised strikebreakers by the railway company.

Found a Candidate.
Jefferson City, Sept. 16.—The Republican congressional committee of this (the eighth) district held a meeting here and named D. W. Peterson of this city as their party candidate for congress. This nomination has been going begging for a month.

Found \$200 Pearl.
Sedalia, Mo., Sept. 16.—J. H. Newland, living seven miles from Sedalia, found a \$200 pink pearl in a mussel shell picked up in Muddy creek. Jewelers say the pearl is perfect. It weighed almost two carats.

RESTORE GRAY HAIR TO NATURAL COLOR

By Common Garden Sage a Simple Remedy for Dandruff, Falling, Faded, Gray Hair.

The old idea of using Sage for darkening the hair is again coming in vogue. Our grandmothers had dark, glossy hair at seventy-five, while our mothers are gray before they are fifty. Our grandmothers kept their hair soft and glossy with a "Sage Tea," which also restored the natural color.

One objection to using such a preparation was the trouble of making it. This objection has been overcome by the Wyeth Chemical Company of New York, who has placed on the market a superior preparation of Sage, combined with Sulphur and other valuable remedies for dandruff, itching scalp, and thin, weak, falling hair.

The beauty of the hair depends more on its richness, even shading than anything else. Don't have dry, harsh faded hair, when a simple, harmless remedy will bring back the color in a few days; and don't be tormented with dandruff, itching scalp and loose, falling hairs. Wyeth's Sage and Sulphur Hair Remedy will quickly correct these troubles, and give color, strength and beauty to your hair.

Get a fifty cent bottle from your druggist today, and prove this to your own satisfaction. All druggists sell it, under guarantee that the money will be refunded if the remedy is not exactly as represented. Agent Koch Pharmacy.

An Estate Farm for Sale

Consisting of 350 acres, located eight miles southwest of Maryville. All smooth prairie land, subject to cultivation, with the exception of 20 acres of timber land, all under same fence. An ideal stock farm. Within a half mile of farm a good school house. Well improved, large barn 60x30, hog houses, double corn cribs, good dwelling of six rooms, a good tenant 4-room house, one splendid well with windmill, one fountain or spring piped into cement tank. The farm lies in one body, but could be divided into three smaller farms to good advantage. Can be purchased for \$125 an acre if bought by December 1, 1912. Terms, cash.

Address all communications to Wm. Everhart, Maryville, Mo., or to Joseph Everhart, Pickering, Mo. JOSEPH AND WILLIAM EVERHART, Executors of the Estate.

F. R. Anthony, M. D. SPECIALIST.

Practice limited to diseases of the Eye, Ear, Nose and Throat, and general consultation. All phones. Office hours, 9 to 11 a. m.; 2 to 4 p. m.

FARM FOR SALE

The Charles Wells farm of 160 acres, eight miles southwest of Maryville, is offered for sale. Land in splendid condition. Good improvements and always plenty of water.

MANY WINDOWS DECORATED.

The Drug Store Windows Are Nicely Decorated and Fixed Up.

Many store windows are nicely decorated this week for the fair. The store window in T. J. Parle's drug store, in street fair colors of purple and orange, is a very pretty window and the work was done by Frank Green.

Another store which is also very prettily decorated for the fair is that of the J. C. Ferritor drug store, on the north side of the square.

BAND STAND WILL BE USED.

While It Will Not Be Completed, Still It Will Be Ready for Use.

The new band stand in the court house yard is nearing completion, and by tonight it is expected that the railing will be finished. All that remains after the railing are the eight poles and the light fixtures, but that will not be up this week. The stand will be used this week and the public wedding to take place on Thursday afternoon will be held there.

Was at Arkoe.

Congressman Charles F. Booher of Savannah was at Arkoe Saturday to make a political talk, but owing to the rain and the few people present he did not speak. The rain put a damper on the picnic, and there were only a few that went to Arkoe Saturday. James Swinford and Lefe Stamper of this city were in that town Saturday taking in the picnic.

Normal Attendance 228.

The attendance at the Normal up to Monday noon was 228. The attendance at the term last fall was 236. It is expected that the enrollment will reach the 300 mark this term, as many are coming in this week.

Dr. Anthony at Home.

Dr. and Mrs. F. R. Anthony returned Monday morning from a four days' trip to St. Louis and South Bend, Ind. They visited Mrs. Anthony's parents, Mr. and Mrs. J. C. Mather, at South Bend.

H. A. Younke of Kansas City returned to his employment Saturday, after a two days' visit with his family, who are at the home of Mrs. Younke's parents, Mr. and Mrs. M. C. Baublitts.

Judge and Mrs. L. K. Alderman went to St. Joseph Monday morning to spend the day with their son, Dale V. Alderman, and Mrs. Alderman.

Mrs. Sylvester Dooley of Clarinda arrived Saturday on a visit to her parents, Professor and Mrs. B. F. Duncan.

Walter Wray left Monday for Columbia, where he will attend the state university this year.

Pompeian Venus is Unearthed.

One of the latest and most interesting things uncovered during the new excavations at Pompeii under the direction of Professor Spinazzola, is a fresco which is regarded as the best which has yet been found. It is very beautiful, and in a perfect state of preservation. It was one of the ornaments of the facade of a house situated in the main public thoroughfare, of which the roof was in an almost intact condition. It represents the Pompeian Venus standing erect, crowned with a diadem, in the midst of flying Cupids, on a chariot drawn by four Indian elephants. Seen from the front, the representation of these animals is strikingly realistic. The archaeological value of the fresco is extremely great, for the colors are very fresh and harmonious.

No Maltese Cats in Malta.

James Oliver Laine, American consul at Malta, informs the state department that many Americans have asked him to give names of breeders of pure blood Maltese terriers and cats. He says there are a few so-called Maltese terriers in Malta and they are not of pure blood. The puppies which the street hawkers offer for sale to tourists are more or less mongrels with a strain of the old breed. Maltese cats do not exist in Malta, at least not one of the color called Maltese in the United States, has been seen there.

Modern Morals.

"This latter-day or new morality is too lax for me." The speaker was Jerome S. McWade, the Duluth millionaire. He continued:

"This new morality, which seems in its tolerance rather to encourage than to oppose wickedness, reminds me of a lad in my Sunday school class. 'Now, Tommy,' I said to this lad one Sunday afternoon, 'now, Tommy, what must be done before our sins can be forgiven?' 'We must sin,' Tommy replied."

Low Wages for Rescuers.

The appalling number of suicides in St. Petersburg has created a new occupation for the workless. Many watchers assemble every day on the banks of the Neva and the canals on the lookout for attempted suicides. For each rescue the "hero" receives \$2.50 from the prefecture of police. In one week one man made \$7.50 in this way.

CHIMNEYS OF COLONIAL DAYS

Fireplaces Played an Important Part in the Homes of the Early Colonials.

In America the early colonists had little use for the mason's art, except in the construction of the huge chimney stacks which in any dwelling of considerable size and any pretensions to comfort formed a very considerable part of the structure. The great kitchen fireplace and oven, with smaller hearths in from two to four rooms on each floor, required a very considerable part of the material and skilled labor bestowed upon a colonial homestead in the more northern colonies.

In some sections where the dangers of an attack by Indian raiders were imminent, the wooden walls of the lower story inclosed a stout wall of brick or a kind of rubble masonry. Some of these buildings are still standing and inhabited, although dating back (at least so far as the lower stories are concerned) more than two centuries. A very few brick buildings have wholly or in part come down to us from the first years of colonization, and until within the last half century some that preserved the peculiar features of Elizabethan and Stuart types of dwelling and business structures. Much of the brick and about all the great flooring tiles and ornamental tiling were at first imported from Europe, but lime and brick of good quality were soon produced in almost every community.—National Magazine.

LINEN OVER 6,000 YEARS OLD

Fabric Found in Cemetery at Tarkhan as Fresh as When First Woven.

In one of the apartments at University college Prof. Flinders Petrie has placed on exhibition some remarkably interesting antiquities unearthed at Tarkhan, Heliopolis and Memphis under the auspices of the British School of Archaeology in Egypt, says the Washington Herald.

The great cemetery of Tarkhan, which occupied a mile of desert 40 miles south of Cairo, and which dates from the earliest historic age until the race of the pyramid builders, has proved to be exceedingly prolific in antiquities. What has struck Prof. Petrie is the extraordinary preservation of the woodwork and clothing unearthed from these places of interment of long ago.

A great sheet of linen which is placed on exhibition is as fresh and as firm as when cut from the original length—and it is some 6,000 years old. So, likewise, with the woodwork, which in but few instances shows signs of decay. Here are boxes that served their purpose as funeral caskets, built of planks of acacia and shittim wood, and as firm and secure as when lowered into the bosom of the earth in firm antiquity.

Wandering Youth.

Sudden disappearances of men and women unhappily are a pronounced feature in the life of all great cities, but London has been the first of the world's maelstroms to attempt a tabulation and classification. Last year 2,676 women over sixteen years of age were swallowed up in the insatiable vortex of that metropolis without immediate trace. More startling and pregnant with thought to all who are concerned with the problem of safeguarding the young is that, during the same year, 1,118 girls between the ages of ten and sixteen were reported to the metropolitan police as missing. The ultimate tracing of these victims of the dangers of a large city to adolescent womanhood resulted in sad revelations to parents and friends. Some of the missing are still missing and will be. The moral is clear. He who runs may read. Watch, guide and help the youth, girls and boys, who have reached or passed the critical time of maturity. "The thoughts of youth are long, long thoughts."

Puzzles for Patients.

Although the patient had waited half an hour for her interview, the time had not dragged.

"I worked on one of those puzzles," she said. "By the way, doctor, you are not a children's specialist; then why do you keep so many puzzles in your reception room?"

"You answered your own question before you asked it," the doctor said. "I keep them to amuse the grown-ups. Most people who feel bad enough to visit a doctor can entertain themselves better with a puzzle than a book or magazine. Every puzzle that has achieved popularity in the last twenty-five years has a place in that cabinet. Dentists also rely on puzzles to keep their patients in good humor, for even toothache will share attention with a good puzzle."

Horses in the Glacial Epoch.

The opinion has been expressed that horses became extinct in the glacial regions of North America, and probably in the whole continent, about the middle of the glacial epoch. It has been pointed out that all the apparently authentic discoveries of fossil horses in the United States east of the great plains fall into two sets of localities, one along the Atlantic and Gulf coasts and the other extended from New Jersey to South Dakota, the localities in the last set lying, with few exceptions, close to the southern border of the drift covered area. The earliest discovery of fossil horse remains was made near the Neversink Highlands.—Harper's Weekly.

PATHOS IN PARIS PAWNSHOP

French Marquise Bequeathes \$20,000 to Be Used to Redeem Pledges of the Poor.

The Marquise de Guerry has bequeathed nearly \$20,000 to the city of Paris for the redemption of small objects pledged in the state pawnshops by the poor.

The legacy has its origin in a visit paid one day by the marquise to the chief depot of the Mont de Pieté, as the state pawnbroking establishment is called in France, where her attention was attracted by a silver christening set, consisting of a knife, fork and spoon, such as is given to a child on its baptism or first communion. The set was tarnished with age and the ticket showed it had been in pawn for half a century.

The marquise was told that regularly for many years since 1860, when the little christening gift was pawned, either the father or the mother of the recipient had come and paid the trifling interest on the pledge, doubtless a relic of a dead child. Each year the man or his wife was a little older, a little shabbier, a little sadder, but the interest was punctually paid.

Then the man ceased his annual visits and only the woman came, until she, too, failed to appear. Neither was ever seen again, and the little christening gift remained in its wrapping getting blacker and dustier until it was seen by the Marquise de Guerry.

TO RESTORE GARDEN OF EDEN

Sentimental Feature Connected With Great Irrigation Project in Asiatic Turkey.

The restoration of the Garden of Eden is a sentimental feature of the great irrigation project by which Sir William Willcocks hopes to bring back the early fertility to a great region in Asiatic Turkey. The country bordering the lower Euphrates and Tigris rivers was long a center of prosperity and wealth. It was made to flourish by extensive irrigation works, the ruins of which still exist, but the land is now barren by drought, though much of it is swept by occasional floods. The engineers propose to reconstruct the ancient works on an enlarged and improved plan. They have found a depression in the desert, into which the overflow from the Euphrates can be led, and they expect to be able to regulate the Tigris, though this is a more difficult feat than the ancients never fully accomplished. The probable great productivity of the delta of the two rivers under suitable irrigation is indicated by analyses showing the soil to be richer than that of Egypt or the Sudan. It is believed that the Garden of Eden will be found just north of Ur, at the ancient junction of the Tigris and Euphrates. Ur is supposed to have been a maritime town, but its remains are now six miles west of the Euphrates and 125 miles from the sea.

Crawl on All Fours to Get Tall.

A man's organs and those of his bones which are not subjected to pressure grow continuously until he is forty years old; that is to say, the heart should become stronger, the capacity of the lungs increase, and the brain should develop steadily until the fourth decade of life. Also one should wear a larger hat at the age of forty than at thirty. A man ceases to grow tall, however, at the beginning of the third decade, because after that time the downward pressure exerted by the weight of the body while in the erect position compresses the vertebrae, or small bones in the spine, the discs of cartilage between them, the pelvis and the thigh bones, and this pressure overcomes the natural elasticity of the discs and the growth of these bones. However, a British scientist contends that were a man a quadruped and therefore freed from the downward pressure produced by his weight upon his spinal column, he would continue to grow in height for ten years longer than he does at present, since it has been found that bones not subjected to compression increase up to the fourth decade.

Lopping Off the Ends.

Robert Henri, the noted artist, was talking at a dinner in New York about the over-finished and banal work of painters of the Bouguereau type.

"Leighton, the English Bouguereau, met Whistler," said Mr. Henri, "one day in Piccadilly. The two men sauntered through the Burlington Arcade talking art."

"But, my dear Whistler," said Leighton, "you leave your work so rough, so sketchy! My dear Whistler, why do you never finish?"

"Whistler screwed his glass into his eye and gave a furtive laugh. 'My dear Leighton,' he said, 'why do you ever begin?'"

These Times.

Ex-Governor Pennypacker, discussing the divorce evil in Philadelphia, said with a smile:

"In these times one never, as the saying goes, knows where one is at. An acquaintance of mine extended his hand to me at the Historical society the other day and cried:

"'Congratulations! I am the happiest man alive!'"

"I looked at him doubtfully. 'Engaged, married or divorced?' I asked."

Time to Quit.

"The kentry is going plumb to pot," "See here, Peleg. If you don't stop going around with such a long face, the barber is going to charge you extra for shaving you."

SPEAKING AS A FINE ART

Many Men Who Attempt to Address Audiences Cannot Make Themselves Heard.

Speaking is one of those arts which people seem to think it unnecessary to study and learn, and the probability is that most speakers of the kind mentioned are blissfully unaware of their inaudibility. Doubtless their voice resounds comfortably in the empty spaces of their own chest and head, and this prevents them from knowing that it does not penetrate to the auditory apparatus of other people.

To be a lecturer, it is not only necessary to know your subject, but the art of enunciation and audible delivery needs to be learned also. And the sound of one's voice in one's own ears is a most misleading guide. Such people ought to be trained by being made to read or speak from one end of a large room to somebody at the other end, when they would soon find out that tones which pass muster in a conversation are useless in a public speech.

In conversation we carelessly slur half our syllables, leaving our interlocutor to guess them from the context, but this will not do in a public speech, where people are too far off to catch the signs. Again, a word pronounced in the ordinary English way—of throwing a strong accent on a single syllable and slurring the other syllables—becomes reduced to a mere monosyllable when said in that manner in a large room.—Theosophical Path.

THINGS THAT COLOR THE SEA

Blueness of Waters of Old Ocean Is in Constant Ratio to Its Saltness.

It has been proven that the blueness of sea water is in constant ratio to its saltness. In the tropics, the tremendous evaporation induced by the blazing sun causes the water to be much more salt than it is in higher altitudes. For about thirty degrees, both north and south of the equator, the waters of the world's oceans are of an exquisite azure. Beyond these latitudes the blue fades and changes to green, and in the Arctic and Antarctic oceans the greens are almost as vivid as the tropical blues. The extraordinary blueness of the Mediterranean has two causes; one is that very few large rivers of fresh water run into this sea; the second, the Mediterranean is practically land-locked, and, being exposed to a powerful sun, evaporation is great.

China's Yellow Sea is usually supposed to owe its origin to the flood of muddy water which its great rivers pour into it. But here living organisms are responsible for its peculiar tint.—The Sailor's Magazine.

Factory Lighting.

A special report on illumination in factories states that as regards artificial illumination there seems to be little to choose between lighting by electric glow lamps and by modern systems of incandescent gas. Electric light has the advantage of being constant and requiring little attention beyond the systematic dusting and renewal of lamps. The gas systems generally produce a whiter and more powerful light than electric current, but the units are apt to vary much in efficiency, owing to the liability of the mantle to deteriorate. Careful attention, therefore, is required to replace any that show signs of weakness. Electric light, of course, causes no vitiation of the atmosphere; but in the modern systems of gas lighting the amount of gas burnt is so small and the combustion so complete that the effect on the air is minimized. For the perfect local lighting of any point of work the three following conditions must be fulfilled: (1) The illumination must be adequate, (2) "glare" effects must be absent, and (3) no troublesome shadows must be cast on the work.

World's Largest Index.

On Beacon Hill in Boston, under the golden dome of the state house, is one of the largest indexes in the world. In fact, the Russian public index is the only one known to be larger. More than nine million names, giving births, marriages and deaths in Massachusetts from 1843, make a complete record, showing not only where people were born and where they died, but also statistics which are vital in making up calculations. Before this time the records were kept in the different towns, but now they are all concentrated in the state house in Boston. In a relatively small space all these records are preserved, and as births, marriages and deaths come in, different forms of cards are used, and a great variety of names, Grecian, Assyrian, Italian, and others now mingle with good old New England names that have been on the records since the landing of the Mayflower.

The Camel's Peculiarity.

The camel alone among animals does not perspire with its entire skin. It perspires only in the back of the neck, and so when traveling in extreme heat does not require a continual supply of water in order to replace the moisture evaporated through the pores.

A curious consequence of this singularity is the fluctuation, within four degrees, of the blood temperature of a healthy camel. That is a rise of temperature of four degrees, which in a human being and in other mammals would be a sign of fever, is a normal function with the camel.

WANTS

Advertisements are inserted in this column at the rate of three lines (18 words) three days for 25 cents. For ads larger than three lines one cent extra will be charged for each word in excess of 18. Cash must accompany order for these small amounts.
